## "HOW COULD YOU DO THIS?"

No matter how many people look at the same issue of EGM, they will each have their own view of what's written. No matter how many letters we receive indicting us for saying that Nintendo can do no wrong, we get just as many that say our motives should be questioned because we exclusively heap praise on Sega as the only company that can do things right.

Recently, I was witness to this type of individual interpretation when I casually drifted through the topics of a national bulletin board service. There was an enormous amount of benter concerning the latest issue of EGM and a decision made by the Review Crew to gauge their opinions on Capcom's latest Street Fighter entry on the abundant similarities to previous installments of the game. While many agreed with the assessment of the reviewers that Street Fighter, unlike other fighter series, had failed to enhance the original enough to warrant an additional purchase, many felt the direction was totally inappropriate.

"How could they do this?" wrote one on-line scribe. Many echoed these sentiments and questioned how a Game Boy game could win the "Game of the Month" award when the latest SF entry was clearly so much better.

The answer is simple. Given the following that the Street Fighter franchise has among players (look at the number of times EGM has featured the game on its cover), Capcom has occupied the enviable position of deciding on whether or not to create minor upgrades to the classic game or to expand on the concept in its totality. As is evidenced by the three separate versions of the game that are currently in circulation for the Super NES, Capcom has provided minor upgrades that, from the perspective of the reviewers that have been chosen to play them, have unfortunately become repetitive.

Sure, Super Street Fighter is a superior game to earlier efforts that got better scores, but if you go back a couple of years you'll see that Monaco GP got incredible ratings upon its release. Would that game garner the same 5's and 10's it received in 1992? Does the fact that the latest edition to the SF2 saga has new play elements automatically translate into an experience deserving of a higher score? Obviously, as the scores themselves illustrated last month, it does not. We employ separate reviewers to each independently look at carts to provide a variety of opinions and insure that no one person has the ability to flack a game. The benefits of this system are clearly evident.

So is it wrong that the Review Crew used their wealth of background knowledge and experiences to come to the conclusions that were made? As has been said in this space before, they rate each game on its own merits, but it would be just as unfair for them to ignore previous versions of the same game in their current critiques as it would for them to be expected to give Monaco GP the ratings it received when it was released.

Why am I taking Ed's space in the editor's column this month? It's not solely to explain how expectations change over time, but to also highlight what Capcom did in response to the reviews this new game received. And it is that story I will relate to you next month...

## LETTER OF THE MONTH!

### ACCESSORY ATTRACTION

I know this isn't exactly your area of expertise, but I've seen a lot of new accessories for the Genesis and the Sega CD (such as the Activator, Jukebox, etc.), but none now for the Super NES, Game Boy, or NES. I own a Super NES and a Game Boy and I'm very disappointed with Nintendo's lack of accessories. The closest thing I've seen Nintendo release lately is the Super Game Boy, which, I might add, did not get a big "WHOOPEE!" from me. It's been two years since Nintendo came out with a new accessory. What's going on here? Are Sega's designers just more creative, or is Nintendo putting its feet up on the desk and thinking, "I got it made, I'm killing Sega in the sales." You probably won't print this, but if you do, I'd love a response.

David Schenbeck  
Kennesaw, GA

(Ed: Nintendo has brought out a few new accessories, but they have gone unheeded. Nintendo has more experience with the success and failure of a new add-on. Take for instance Nintendo's first few accessories for the NES, the R.O.B. robot, and the Zapper light gun. The games made for these were few, and they were not as popular as Nintendo might have

Nintendo's Super Game Boy is a chance to rest your eyes.

liked. The R.O.B. had two games, Gyromite and Stack-Up. Nintendo also released the Power Pad for the NES. That too, did not go over as well. Nintendo, unlike Sega, can rely on third parties for accessories. Remember the Power Glove and U-Force? The Jukebox you mention is also being made for the SUPER NES. Third parties like Neko, Nuky, and Aces release joysticks, battery packs, carrying cases, etc. The Super NES has had the Super Scope, the Mouse, and the SG&L. Sega's Activator is selling as a novelty piece, and at its price, it's not exactly a great value (with Eternal Champions, it's more than the price of the Genesis system. When Nintendo's got something good, they put it out.)

### ONE RPG WITH CHEESE TO GO

I am a true RPG fan. I play them all day and all night. My record playing is about 18 hours straight! I read about these RPG games in magazines and they say these games contain weeks worth of playing time, yet, when I play them it takes me maybe a little more than a day. My favorite RPG so far is Lunar-The Silver Star. It had a great plot and a lot of good ideas put into it, but it didn't last long enough. I was wondering if you could tell me what the longest, most challenging RPG is and how much it costs. (I'll play it and then I'll write back and tell you how it went. I have a Sega and I don't have a Super Nintendo. Thanks

Jim Graham  
Port Orchard, WA

(Ed: Unfortunately, Sega has not made an RPG for a while, and their third party licensees don't seem to want to bring any over from Japan. We're lucky we even saw Lunar in this country if you've tried all the Phantasy Star games on the Genesis (I, II, IV later this year), and Shining in the Darkness, Shining Force, Dark Wizard, and Landstalker, then there's nothing else. You might want to check out Working Design's new game, Vay. Lunar 2 may be coming out soon from them as well. The fact is that Sega and their licensees don't release these games, so you might want to turn to Nintendo for salvation. You can get a core Super NES for around \$80, and then you can play the legendary Final Fantasy games, Breath of Fire, Secret of Mana, Zelda, Soulblazer, The Seventh Sign, and many others. The Super NES gets more RPGs than the Genesis, and usually, they are longer, unless you compare one to a big Sega CD RPG. Until Sega starts to give RPG games what they want and stops delaying these games, the SUPER NES is the best choice for RPGs.)

**CONVERSION AVERSION**

I've bought many games for my Genesis and have enjoyed them, but what I want to know is this: The Super Nintendo is a far superior machine to the Genesis, so why are their games made to a lesser quality than what they could be? Take for instance NBA Jam. It has far superior graphics than the Genesis, yet they deleted some options that I really enjoyed in the Genesis version. One of which was the Auto Stat feature so you don't have to write down a password. Another thing is the music (in the Super NES version), the announcer's voice is muffled and unexciting and there is no background music (in the Super Nintendo supposed to have better sound than the Genesis?). Another thing is the control of the game play. Mortal Kombat on the Genesis has very ugly graphics but it feels more like the arcade. Why is that? I have no problems with Street Fighter so why is the control worse on Mortal Kombat? I mean if you have a better system to work with, why not make it better than the other system? Do the companies intentionally do this so the Genesis won't be blown away? If that is so then I would like to say thanks, since I don't own a Super Nintendo.

Hong Kang  
Alexandria, VA

The first time around with Mortal Kombat, Genesis, Super Nintendo, Game Gear, and even lowly Game Boy received their respective versions available on a cartridge format. Myself and millions of others had to wait patiently for the Sega CD release. I'd love to know why we were made to wait so long for a slightly improved MK.

If you thought that they (Acclaim/Arena) would have gotten their acts together for Sega CD owners regarding MK's release

Mortal Kombat on the Sega CD was disappointing to some gamers.

Dear Ed:

My previous letter intercepted a special letter between Ed and Acclaim. We believe that Acclaim is planning on doing well by releasing a product in 1993, KOMBAT 3!! When we opened the letter we found a very impressive advertising pitch. So impressive it is placed in the back of the four issues. I certainly wanted the letter back together and sent the letter on its way back to Ed. We of course made copies. We are sending this to you then I think because you are such a great magazine. We would like your opinion on the game we have found.

LOOKS LIKE, ISN'T IT?

Mortal Kombat II

A suitable game of blood and gore and death for you and the wife as well and a great time while you fall into the trap.

And out it go the instructions with your family.

And you'll laugh with me.

To see what a hell of a fight you get, watch my staff, watch my opinion.

We say great! We say great!

We say best of all my staff!

We say to the Street Fighter owners which we know are the best.

We say make off my life.

Then Street II back on in place.

Shining my staff for a help over the floor.

Keep my opinion.

I really want you to.

Keep me up.

I'll come back for more.

Thanks for intercepting the letter guys. We'll send your alter egos EGM T-shirts. Thanks for Steven New, Josh Martin, and Kevin Neese of Arlington, TX, for risking life and limb to deliver this letter safely and intact to our offices.

this fall, you thought wrong. I AM [FEEV-ED]. Why are Sega CD owners once again being treated like stepchildren? I would think that an initial release on CD only would cause many Mortal maniacs to loose their puny sinings and upgrade their Genesis or Nintendo to a Sega CD or CDX. Poor planning guys. Why are we being left out again?

James P. McGarry  
Newark, NJ

(Ed: NBA Jam and Mortal Kombat were developed FOR Acclaim by two different development houses - Sculptured Software did the Super NES versions, and Probe worked on the Genesis and Sega CD versions. That was not the case with Capcom's Street Fighter II games, as Capcom developed both the Super NES and Genesis versions. When you have two development houses working on one title for different systems, there's the possibility of a few differences. For instance, Probe got the Genesis to perform well in the game play department, but not as good in the graphics and sound area. Whereas Sculptured did a great job on the Super NES version with the sound and graphics, but missed the game play mark by a bit. No company 'makes' a game

play badly just as the other system will sell more. Both versions of MK and NBA Jam have sold well into the stratosphere. As for your question James, a CD platform is extremely difficult to program for. Especially a game like MK, an arcade translation that demands fast game play with no delays. Therefore, in order to maximize game play time and minimize loading time, Probe and Acclaim opted for the Genesis graphics with arcade sounds, etc. Of course, that won't appease Sega CD owners who wanted to hang for the closest possible translation. Acclaim has no current plans to release Mortal Kombat II on the Sega CD, but it is a possibility.)

The Super NES version of the original MK had great graphics and sounds.

# PUSH YOUR SEGA CD TO THE MAX!

**B**ased on the elite "Flying Nightmares" Marine Harrier squadron, this game really pushes the envelope of CD technology.

Everything is state-of-the-art: Stunning 3D texture mapped graphics, intense full-motion video sequences, internal, external and missile camera angles. Plus the hottest CD-quality sounds and special effects.

It all adds up to the most exciting combat flight simulator on Sega CD. Imagine the power under your command! Harder jump jets that can turn on a dime and stop dead in midair. Laser-guided missiles, cluster

bombs and rocket-jumping pods.

It's enough to make your heart pound and palms sweat.

It'll also strain your brain. This just happens to be one intelligent action-adventure game as well.

Push *Nightmares*. Pushing CD technology — and you — to the max.

The official seal of your assurance is the Sega CD logo. It's the quality standard of SEGA's top games and accessories. It's the seal of excellence that you can compare with the SEGA CD SYSTEM.

**WHEN PAC RULED THE EARTH**

All this grip about which system is better has gotten me thinking. I own over 180 games for the 7800/2600, eight games for the 5200, and nine Lynx games (and still collecting 2600, 5200, 7800 games by the way). What were the specifications of each of these systems? And as an extra challenge, please tell me the largest game in Megs (or fractions of Megs) of each system. Please be very complete and thorough.

Also, there are two 7800 games (at least) that use a light zapper. Would an old Sega Master System light phaser work with my 7800 or maybe vice versa?

Thanks! Keep up the excellent mag!

Andrew Dowler  
Nolanville, TX

(Ed: In the old days, no one cared how many Megs a game was, or how many sprites could be on the screen at one time. It just wasn't a factor. What mattered in those days was that the game had a lot of play variations (skill levels), could accommodate other players, and if it sounded cool or not. But, that's not going to answer your question. I asked a few game collectors if they knew, and they told me straight out of the 2600/7800/5200 developer's guide. All of the above mentioned systems are 8-Bit, using a family of 6502 processors at their heart. Today's Super NES, Lynx, NES, and Duo systems use a variant of this very same family. The 2600 uses a 6507, and can address up to 8k, with a maximum cart size of 32k (rumor has it Road Runner for the 2600 is 32k, the largest 2600/7800 game ever made). The resolution is higher than you might think: 160x192. The 5200 uses a 6502 family chip as well, the same one used in Atari's 400 and 800 computers. It has a special

704 (Television Interface Adapter) that controls the brightness and the background. It also contained a 6532 chip, a "Riot Chop" as it was dubbed, which has usable RAM in it. It would control the timer on certain games, and the controller's/rot functions. The 7800 uses a custom chip called the 6502C, developed by Alan so that the 7800 can accommodate 2600 games. The 7800 has 64k addressing, and 4k of RAM. It could display 25 colors out of a palette of 256. Each sprite could have three colors with background. Since the 2600/7800 and Master System have the same pins for controllers, it's possible that what you mention would work, but try it first. For more information about games of the past, you may want to check out a new book by author Leonard Herman, called Phoenix: The Rise and Fall of Home Video Games. It's very informative and costs only \$14, that includes shipping and handling. Make checks out to Leonard Herman, and send it to Phoenix, P.O. Box 3814, Union, NJ 07083-1891.)

**THE END IS NEVER PRETTY**

Why is it that so many great games have such sorry endings? To top the list is Super Metroid by Nintendo, now one of my favorite games—great game play, but the ending is the weakest ending I've seen—even with 100 percent item collection rate and a time of 2:59. Some other great games with weak endings include Metroid 2-Return of Samus (Game Boy), Fatal Fury 2 (Super NES), RoboCop Vs Terminator, & Firepower: 2000.

Mark Cooper  
Houston, TX

(Ed: Endings are a dying breed. Maybe the letter is something that the video game companies should take a serious look at. Others who feel the same way as you do have been complaining about the long, drawn out credit scenes that take up 75 percent or more of the ending. In Sonic 3, for example. Sure, it's important to know who's behind the game, but I'd rather see at least two minutes of ending for two minutes of credits.)

## A PLANET UNDER EVERY TREE

I am seriously thinking about purchasing the upcoming Super 32X, but I was wondering if it would be wiser to shell out some more cash for the Saturn instead. Since the 32X isn't compatible with the Saturn, they have to make a whole separate line of games for the 32X and it already seems to me from looking at some lists of upcoming games from your magazine and others that Sega is devoting more time to games for the Saturn.

If the Japanese Saturn never comes our way, we'll never play Magic Knight!

rather than the 32X. I don't want to waste my money on the 32X if there is only going to be a handful of games. I bought a Sega CD not too long ago and rarely do I see any new games come out for it, but I see hundreds of new Genesis games coming out. If the 32X is only going to come out with a few games every couple of months like the Sega CD, when the Saturn is going to get more games, then I think I might buy the Saturn instead. Could you please tell me which system is better to buy and how much each will cost. I don't want to make the same mistake that I did when I bought the Sega CD.

Scott Rusnak  
Charlotte, NC

Okay, let's talk facts. We've been hearing about Saturn for about a year now, and now the Genesis 32X is coming. The specs have been released for both systems, but no one has compared the two machines. I am interested in both, I want the power of Saturn, but the price of the 32X makes it really attractive. How do the systems compare? How much of a noticeable difference will there be between them? One of my main concerns is about games overlapping. Will there be a 32X version and a Saturn version of games?

Will there be benefits to owning both? I mean, is the 32X only going to get translations of Saturn games or will there be original games exclusive to both? I guess it's still up in the air as to when Saturn will actually arrive in America (I've heard sometime between May-November '95). Will Sega abandon 32X once Saturn hits? I know I have a lot of questions, but I'm just trying to decide how to spend my money. I'm a little apprehensive about all the new things Sega wants to do. The Sega CD has left a bad taste in my mouth. I don't want to get burned again.

PHI Hinkle  
San Antonio, TX

I was going to buy a new system this Christmas and I was wondering if you had any suggestions. My price range is up to \$450. Will Electronic Arts sign on with the Saturn? Is the Saturn going to be the best or one of the best systems coming out? And lastly, will I be able to buy a Saturn in the U.S. by Christmas? I want to know all I can about the powerful Saturn.

Brian Heitze  
Downs Grove, IL

(Ed: There are a LOT of misconceptions and rumors about the Sega Saturn system. Up to this point, all we have seen is what has been announced in Japan. The Sega Saturn is a Japanese machine, and Sega of America still stresses the fact that the Saturn has not been announced yet, and that they are concentrating on the 32X for the moment. That means good luck trying to get a Saturn machine for Christmas, unless you live in Japan. From what was complete at the Tokyo Toy Show, Japanese gamers will be lucky if they even have a handful of Saturn titles to choose from by the end of the year. On this side of the Pacific, the 32X will be Sega's major Christmas focus, and while we have seen a few of the works in progress, no game is close to being complete. Comparing the Saturn and 32X by specs alone isn't something that can be done. They are two totally separate machines. Overlap will definitely be something Sega will have to be careful with. Genesis owners who bought Sega's \$1400 Virtua Racing cartridge won't be happy when they see the 32X's Virtua Racing Deluxe selling for half that price. The Sega 32X CD games will also be overlaps, like *Tomcat Alley Delux*, *Fahrenheit*, and *Mighty Ravlers*. All three games will be released on the regular Sega CD, and TCA already is on the market. As for suggestions as to which system deserves your hard earned money, this Christmas, there really aren't any. Unless you fear that the 32X is a

## PHANTASY STAR I A RE-RELEASE WHOSE TIME HAS COME

Thank Edwin Nelson of Chicago, IL, for this fantastic idea. It seems that he really likes the *Phantasy Star* series, but he can't find the original. So, in the spirit of Nintendo's Super Mario All-Stars, he'd like to see Sega upgrade the original game to 16-Bit and release it in this country! All of you who think this idea is great, write to Sega and tell them you want it! Here's how to form your letter:

Dear Sega of America,  
I have owned a Sega Genesis for some time and am a big fan of your *Phantasy Star* RPG series. I have played the Genesis versions thoroughly, and I can't wait for *Phantasy Star IV* later this year.

But, I would like to play the original *Phantasy Star* to see how it all started. I cannot find a copy of *Phantasy Star*, let alone a Master System to play it on.

So, myself and many others like me would appreciate it if you would upgrade the graphics, sound, etc., and release it on the Genesis. It would be like Nintendo's Mario All-Stars cart, and I know that I would buy it instantly, as would many others. It would not be hard to do, and it would be very popular.

Thank you for your time,

good investment with Sega trying (and failing) to hold the Saturn from gamers, then go with that. Remember, less than a year away you've got Ultra 64, the PlayStation, the Jaguar CD-ROM, the Neo-Geo CD, and all the configurations of the 3DO to deal with. So, the best advice would be to sit and wait with your money. Then hope Sega gets their act together.)

# Video JUKEBOX™ VJ

NETWORKED MULTI-CARTRIDGE DOCK

## Rack & Stack, Jack!

**Breaking News  
from Silicon  
Valley!  
Video JukeBox  
Ready for  
Prime Time!**

**Releases for Sega  
Genesis, SNES, & Atari  
Jaguar Soon!**

This radical new technology utilizes nuclear radioactive electrolytic cell microfabrication covered with a silicon outer shell with a 6 cylinder overcoat suspension!

## HUH?

Just pullin' yer yank, man. The Video JukeBox™ (nick-named the VJ) really uses a crankin' computer driven, silicon based ASIC that allows you to switch between 1 and 6 carts on the fly...but wait, there's more! You can attach more than one VJ together to hold 12, 18—up to 36 carts! The more VJs you stack, the more of your games are networked! Kille!

Once the carts are jacked in, you'll never have to flip 'em out. A black steel super shell to match your stereo makes it durable, with 3 kick-butt look! A quality product at an excellent price, would not you agree? No

doubt! \$549.99...even your mom will beg for one! Connecting her to the old man should be easy... just tell 'em it'll keep your carts off the floor, so any paralysis resulting from slipping on your carts and dein' a half-gallon into the TV would be indubitably impossible!

Grab a VJ, or two or three... at Electronic Boutique, Software, Etc. and other popular hang outs near you. For other store locations, pick up the portable and call!

## GAME OF THE MONTH

**Super NES Interplay**

### Blackthorne

**Action Release: Now**

**Levels: 16 2 Mag**

### ED SEMRAD

Blackthorne is one of the best action games to come around in quite some time. It's more or less a puzzle game with lots of brain power involved solving its riddles. The graphics are as well as it animated. The dark mood of the atmosphere, and blowing away the enemies is a ghoulish thrill. This game is a real-see. If you've ever wanted a game that's easy to get into, you'll love this one.

### DANYON CARPENTER

Right on par with games like Prince of Persia oomes Blackthorne, a top-to-play action game with smooth animation. The game's strategy and mystery-solving mechanics break from simple, standard everything-goes. It takes on a dark, gothic feel which makes some enemies hard to see in the background, but on the other hand, it just adds to the mystery. Blackthorne is simply too cool!

### AL MANUEL

Blackthorne is one of the coolest games to come around. With some of the best animation ever you get to control a soldier through some of the most complex mazes I've ever seen. The most gruesome enemies I love the sadistic humor of seeing prisoners up at attention and you vital information. The game has a finely feeling mode. The graphics are dark and the sound is superb. A most enjoyable game!

### SUSHI-X

In the same spirit as the earlier games Prince of Persia. Out of This World, and Flashback, here comes Blackthorne. This game really surprised me with its great control and variety of attacks. The one great thing is some of the times, but the variety of puzzles to solve makes it hard to blow away. This game will definitely keep you playing for hours, if not days! The password feature is an absolute must.

## MAJOR MIKE'S GAME ROUNUP

### Brainlord Enix/Super NES

Another action/RPG title from Enix. This one is more standard fare, with atmospheric music, huge levels, and average graphics. This one strikes a nice balance between the action and RPG elements, and will probably have a wider appeal. The story is a bit plodding at times, but veteran RPG players will check out quickly and get hooked.

**7 7 7 7**  
**ED GARD AL SUZUKI MIKE**

### Yogi Bair Gameltek/Super NES

Cartoony, and cute, graphics are the highlight of this cartoon-character-pops-to-video game cast. The levels are huge, but the run-and-jump-grab-the-items game play gets monotonous rather quickly. There are some great sound effects, though, and younger kids will probably like to this game faster than other games will.

**7 6 5 7 6**  
**ED GARD AL SUZUKI MIKE**

### R-Type III Jaleco/Super NES

This is definitely one game you won't master in one sitting! Fans of the earlier installments in the R-Type saga will want to check this one out. High levels, incredible bosses (and a rather high difficulty) make this the shooter to get. The two players is a nice option, and there's goodness for the untrained contingent! Nice purchase. Jaleco!

**8 8 8 8 8**  
**ED GARD AL SUZUKI MIKE**

### Clay Fighter Interlog/Genesis

Everything on the Super NES version has been faithfully carried over—all the moves, all the fighters and, remarkably, clear and crisp voice! This was always a clever parody of the fighting genre, and I can't wait for C2 Judgment Clay to arrive. The control, however, is a little bit touchy, and you will definitely want to use the six-button controller to fully enjoy this one.

Super NES	Emuloid
<b>Power Rangers</b>	
Action	Release: Now
Levels: 7	18 Meg

I'm sure that this game is intended for a younger audience, because for the average player, it's much easier. The different character sets are a nice idea, but the characters are animated rather poorly. This cart also sounds nice, because that's the first level this cart got way too monotonous, with none of the effects that made the first part so cool. Power Rangers looks good, and plays well, but it's okay.

I don't care for the show at all, but the game comes off rather well. Although it's not another mindless Final Fight type game, all the rag tags in the show will probably get themselves enjoying this one. This game is simply way too easy for experienced players to enjoy. The animation also looks like a bad case of the choppy. As before, if you like the show, you may like the game but not for very long.

Power Rangers is nothing more than your average punch and kick action-overdose game. It offers very little challenge. There should have been more controllers used! This also should have been a two-player cooperative mode game. On the other hand, the sound is good with some music intro straight from the show. I also like the ability to switch between any of the five characters. This game could have been more.

Take away the title, and Power Rangers is nothing more than a side-scrolling Final Fight punch-and-kick game with popular characters from the cartoon. Power Ranger attacks add to the game's diversity, and the graphics are excellent. However, I was left wanting something more. This game will probably be a flops-hit, but don't let the sales numbers fool you—you will probably be disappointed.

Super NES	Genesis
<b>The Death/Return of Superman</b>	
Action	Release: Now
Levels: 10	18 Meg

As far as side-scrolling fighting carts go, I'd have to say that this one is only average. The graphics do not quite reach the standards. The level design is repetitive, and there aren't that many types of enemies. The moves are quite cheap, and the strategies don't really stand out. The control was twice as good had more diversity, this cart would be a lot better. It's only okay. Nothing special.

Average. That's the best word to describe this game. The moves are average, the plot is average, and this is only appeal to those who watch the comic books. Repeating the other word that comes to mind is average game of the release. The same enemies over and over. This game is even worse than the background repeats excessively. As it stands, more variety and better control would certainly help.

The Death and Return of Superman is definitely a game that the comic book fans would love because it has the comic book expert's touch other than the comic book books. It's nothing more than a Final Fight rip-off. Almost every time you can see the "Final" and "Return" scroll by in the background! This game is one you might want to rent before you go out and purchase it!

I liked Final Fight and similar types of side-scrollers but Superman seemed to be just another. This game isn't bad but it just doesn't have anything special about it. I like it stand out. The only thing I like the four different Supermans a plus but the background and enemies seemed to be a little too much. Comic fans will like the authenticity that's brought to video, but others will find it average.

Genesis	Accolade
<b>Zero Tolerance</b>	
GPU	Release: Now
Levels: 30	18 Meg

For those of you who don't put enough Wolfenstein and Doom Accolade has got a new feature on the menu. It's fun to test your reflexes, and it's actually, and plays great. It has the story can get pretty good. The levels are huge and make all the weapons and items pick up. Overall, Zero Tolerance is a fast-paced shooter that shines particularly well on the Sega Genesis.

Well, this is something new for the Genesis. Zero Tolerance looks and feels like Wolfenstein or Doom. The graphics are the extreme good. The only thing anyone will notice is how fast this game is. Getting stuck on all sides is not uncommon. In fact, it's the norm! However, if you feel like juggling your controls and a TV over to a friend's house, you can cooperatively play in a Two-player Mode. Cool and fun.

ZT is one of the most violent games I have ever played. The gore, blood, and carnage throughout this title are excellent. It's a great thing every enemy you kill with all the cool weapons. It's a one-player game, it's great and you care for the two-player cooperative game. Maybe it's because I want to go all the killing. Gaping my partner was fun sometimes. The control also needs tweaking out!

If you like Castle Wolfenstein or Doom just get this one and you'll be right at home. It's a great 3-D scrolling shooter with good graphics and plenty of levels and enemies. It's a good on the Genesis. The sound effects are decent but they get very annoying. The amount of gabling used in this scrolling and fun game play make it worth the effort. I also liked the split monitor option that it came with.

## MORE WAY!

As if this tip sheet isn't enough, there's more on the way. See, you may have noticed that I've missed a few moves, such as a few fatalities. This is what's available at this time. So, look for an update soon in the pages of EGM!

Run through city streets, over suspension sites, across the circus and forest in a quest to defeat the mad Colonel Deon who's dumping toxic waste! Mario's only weapon is his amazing Soccer Ball, which he uses to knock out gangs.

Play single players and other modes. Just as in soccer, Mario can't use his Bicycle Kick. Use the and foot paddle to control the ball.

## MAJOR MIKE'S GAME ROUNDUP

### GA **Dynastix's *Sandy*** Sega/Genesis

Another unique title from the folks at Treasure (the company that gave us Gunstar Heroes). The main character, Sandy, has several excellent attacks (using different "heads"), and the levels are very colorful, with some knockout visual effects (like the rotating platforms, and the giant blimp dog Boss). This is a top-notch title for the Genesis.

**B** **B** **C** **C** **B**  
**80** **80000** **AL** **80000** **80000**

### GA **Shining Force II** Sega/Genesis

A worthy follow-up to the first RPG, with bigger areas to explore and characters to meet. This will definitely remind you of lots of the first one, and to RPG fans in general. If you've ever played the first *Shining Force*, but the story could use a few more twists and turns. The music is very good, as is the easy-to-follow control configuration.

**7** **6** **7** **7** **7**  
**80** **80000** **AL** **80000** **80000**

### AVL **Power Mooger** Electronic Arts/Sega CD

A very detailed war simulator with good graphics and subtle sounds. Action fans will probably enjoy this one, but students of armed combat (involving troop movements, armaments, and other tactics) will probably love it. A very long game, the title lets you do everything for your armies. Parts of the Korean strategy games will like this.

**7** **7** **6** **7** **6**  
**80** **80000** **AL** **80000** **80000**

### GA **Eye of the Beholder** Sega/Sega CD

A first-person RPG, with some excellent options—like creating your characters from scratch. The combat scenes take a lot of practice to master fully (especially when you have to use a little back on the attack), and moving the characters around the various areas also takes time. The graphics are good enough, but the sound could be improved.

Genesis	Capcom
<b>Super Street Fighter II</b>	
Fighting	Release: Now
Levels: N/A	4D Mag

This is just more of the amazing fighting game to me. But on the other hand, compared to the other Genesis games, this one controls a little weird. The new characters aren't really good, and the graphics are okay. They're just a little better. The audio suffers from the Genesis limitations. If you want a good Street Fighter II, fine, but don't expect too many new ideas. How's about a Street Fighter III?

Although Super SF2 looks and plays identical to the Super NES version, I must give it a lower score due to the "weird" controls this could cause you to lose. Yeah! It's not supposed here? Laying out the game. Other than that, it's just another SF2 for the Genesis characters and a couple new moves. You just might enjoy this game with the volume turned way down, but it's more of the same.

Another year, another Street Fighter. I've heard this song before! Hopefully it will be the last time. The new characters are a great addition, but are they enough reason to go buy the game? Yes, because new moves for the other fighters, but there aren't enough to make it any different. Although the graphics are a good match to the arcade, the sound really takes a dive. It's better to turn down the volume.

You have to face the facts that Street Fighter II is the best playing fighting cart. However, the controls aren't really getting a bit tired. The new characters are a definite improvement, but if it's worth the price, especially with Super SF2, it's not for SF fans will want to at least edition. It is a great port from the arcade with good graphics and sounds. The choice is yours to upgrade or not.

Genesis	Sega
<b>Taz in Escape From Mars</b>	
Action	Release: Now
Levels: N/A	7D Mag

The first Tazmanian Devil game wasn't all that hot, and thankfully Sega added some game play to this one. Taz still suffers a bit, and it's hard to find out what he's doing. The visuals need some help as they are too simple, even for a cartoon. The new Taz world game, it just needs a little work. If you were one of those who enjoyed the last game, then you'll see that this one is definitely better.

The game is a noticeable improvement over the previous Taz games. The control is much more precise and the new techniques Taz can use really help out in the strategic movement. The sound is typical Sega standard—fun but the levels are very colorful and have a lot to interact with. The character concept are always a welcome addition. As a whole, this is a good, solid action game with potential.

Although I'm a pretty big fan of Looney Tunes characters, namely Taz, I can't say the same thing about this game. It's nothing more than a standard platform game with a few new techniques thrown in. The levels are dull and drawn out. My only interest story. Graphics are the levels are huge. Other than that I would say that this game is only for big Taz fans.

I've always liked the Looney Tunes characters in video games, and I found this Taz to be a big improvement over the previous Genesis titles. The new attacks were cool, but some of the Bosses were a bit too hard (like the one with the Boss—good luck!). The graphics by the other Taz characters (like Marvin the Muppet) were also a big plus. I don't think Taz likes the score given by the guy above me...

3DO	Core
<b>Battlecorps</b>	
Shooter	Release: Now
Levels: 13	CD-ROM

I was surprised at the game. The graphics scored very well. The audio was perfect for the machine, and it was just right. Now if I had more pointers, I would really enjoy this CD. It is good to see that the shooting and the music are pretty good. As a fan of mech games, I'm in. I got into this one. It's not great, but it does stand out as one of the better titles on Sega CD.

It's nice to see Sega CD developers taking a new direction in software. Battlecorps is a cool concept that is different as well as it could be. Although everybody has said the graphics are pixelated, it does look like a bad situation in combat. The idea of placing different weapons for a race change, but it can't help but wonder how much better this game could be with clearer graphics.

Well, I'm sorry to say that I can't agree with Ed about this game. I just don't think that Battlecorps is the greatest. For starters, the graphics are pixelated. The first-person battle and the too pixelated making it hard to see the enemy that you are up to. The music does not make the little scenes doesn't make sense in the action. You'd think it was from an adult film. And the controls really need work. 7/10 pass.

I really wish I could understand what the guy is saying in the introduction. Battlecorps is an interesting game that behind-the-scenes, but I just can't do it. The graphics and sound are pixelated, and the music is completely inappropriate. It does have some interesting and challenging levels. The selection of weapons is a nice point.

# You can't get your hands on Troy's playbook, but you can get your hands on a few key pages.

## Troy Aikman NFL™ Football™

Like Page 7, Troy's "Pitch", the play that turned the Bills into four-time losers. And Page 21, Troy's favorite—"Lookie", the one that's made a lot of NFL cornerbacks consider a career change.

With Troy Aikman NFL™ Football™ you get the best of Troy's favorite Superbowl winning, defense-spinning, top secret, confidential, straight-from-the-Cowboys-playbook plays.

And if Troy's favorites on top of more than 50 offensive configurations aren't enough for you, with Troy Aikman NFL Football you can custom design your own plays. Even custom design your whole team. A unique reserve budget, "Team Setup", lets you allocate team funds. So if you want a grind-it-out ball-control offense, invest in a monster line and a power fullback. You want a smothering defense, throw your linebackers a couple mil.

Troy Aikman NFL Football gives you everything you need to build a winning team. Especially Troy's exclusive straight-from-the-Superbowl-champion-Cowboys'-playbook plays.

The die is cast on any offense, you get Troy's offense, with Troy's favorite plays. Now you're backed by the Super Bowl!

Buy Troy's game lets you control your team's budget. Spend up your offensive line, secondary or any other position—just like the pros!

## MAJOR MIKE'S GAME ROUNDUP

### Alone in the Dark Interplay/300

A faithful translation of the PC title, this game has excellent graphics and sound plus a more strategy-oriented, getting-used-to-the-prospective-and-concrete-takes-a-little-bit-of-time. But for long or more deliberate game play, this is the one to get. Played as a man or a woman is a nice touch (each with their own stories, with plenty to explore).

8 8 7 8 8  
 ED BANG AL STEIN MIKE

### Bridgers Tetragon/300

A cool-looking 3-D perspective game that is one of the better games for the system! The game gets really intense (especially in the later levels), and there are several hidden items to find along the way to keep you interested. Fans of puzzle games like Tetris and Pac-Attack will definitely like this game. The graphics are also well done.

8 7 7 8 8  
 ED BANG AL STEIN MIKE

### Shining Force Sega/Game Boy

A nice RPG offering for the portable system! Although it is a sequel down from the 16-Bit big brother version, this one keeps almost all the same elements. There are several hours of game play in the one, with the music and graphics taking first chair. This is the type of game made for the console system when you have a long trip.

8 7 8 7 7  
 ED BANG AL STEIN MIKE

### The Blues Brothers Titus/Game Boy

It took this game long enough to reach the video game platform, but by looking at the finished product it really hasn't been worth the wait. The attacks are awkward and look silly, in addition to the strange power-ups (for the one that makes you invulnerable) it controls alright, but you aren't given nearly enough time in the various stages.

### Way of the Warrior

Fighting Release: Now  
 Levels: N/A CD-ROM

Way of the Warrior has all the makings of a good fighting game. The graphics, controls, and such are great, and with most games of this type, the control is what puts it over the top. This control is much too good to play. The digitized graphics are surprisingly clear, and the animation is pretty good. The sound and the last guy are certainly worth seeing. I'd have to recommend renting this one first to see if you like it or not.

Way of the Warrior is a very beautiful game to look at. Now that the good points have been taken care of, let's see what went wrong. First, the control is absolutely terrible. Jumping around in this game is impossible, let alone the other moves. The music is not very decent but it looks as if it took a long time spent on pretty graphics, rather than a fighting game that was at least playable.

I thought fighting games were supposed to play like fighting games. Well, this one didn't play at all. The controls so bad I had to struggle to get my character to jump forward. The special moves aren't anything special at all if you even get into them. The only redeeming quality about this game is the graphics which is where it seems all the programming went into. Overall, this game isn't even good by accident!

Um, hello? This game has great humor value and some excellent graphics, but as a fighting game no. The controls are very difficult to use and some characters have no clear advantages over others. The Bosses are very big and hard, but this game is better than that to play. I enjoyed watching the boxer guy with the loud trash talk, and Shkelly Joke. Clever, if not overdone, details.

Game Gear Sega

### Dynamite Headdy

Action Release: Now  
 Levels: 5 4 Meg

Headdy for Game Gear turned out to be surprisingly good. It plays well, there are a lot of secrets to find, and the graphics are colorful. I have a feeling that Headdy will be a classic because this one will get even better in the past, because a lot of people don't seem to know about it. The excellent graphics and the excellent sound make this game a one of a kind action game in the portable market. I like this one, and will probably play it during my long trips.

As one would expect, Dynamite Headdy is a great game. The wizards at Treasure programmed this puzzle game with loads of secrets, great graphics, and just plain fun to go along with. The graphics are really crisp and clean. But what really runs, the graphics are really blurry. The Game Gear didn't seem to have the ability to pump out cool tunes, so the music really isn't. Overall, this is a good purchase.

Unlike the Genesis version of the game, I just wasn't impressed enough. Dynamite Headdy for the Game Gear isn't as good as its 16-bit brother. It's good for great play control, the graphics were decent, but the sounds were smaller. There isn't enough to look forward to, and it's not too straight forward. I thought the sounds were nothing to brag about, just average like most sounds on a portable. It's so-so.

A very faithful portable version of Headdy, with great graphics and excellent control. Some of my colleagues and I thought Headdy very creative and fun—far the Sega system. This is one of the more original characters to appear in the game (involving more than just a passing enemies) was. The game's Treasure are certainly on the right track (but with Gunstar Heroes). Let's see some more.

Game Boy GameTek

### Yogi Bear

Action Release: Now  
 Levels: 24 1 Meg

Yogi Bear is a good cart for the Game Boy in terms of game play. It captures the Super NES version of the game, and it enough to make you want to enjoy the game. Yogi has some colorful graphics, and the sounds are great for the GB. I really liked this game, although I don't care for the character Yogi is a good game.

Yogi strikes again. This game simply must be purchased for players under six or it will find its way out the door. The game is simply for the masses for older players. It's not up to baskets, jump, etc. You don't have to read anything, and the game looks like the last of the series. Forget it. Yawn. Another part is that the game runs even when walking very slow. A good gift for the ladies only.

For those who are fans of Yogi Bear, I'm sorry, but this has got to be one of the most boring games I have ever played. The levels don't have any really special or unique things, and seems to look like. The game immediately became a common sense done, and I quickly became bored with the volume. On top of that, Yogi has only one original ability, jumping to defeat enemies. It left me unimpressed.

Yogi on Game Boy is okay. The traditional jump-and-avoid the items game play isn't too quick, though the levels weren't very challenging. The graphics are pretty good, especially with the Super Nintendo (very perished), but there isn't anything distinctive about the game other than the title. Fans of Yogi Bear will probably want to check this out, but there are better carts based on cartoon characters elsewhere.

...Happy ho-hos, of Quarter-mans, 'tis I, the guru of gaming - back once again from the dark side with arms loaded down with the hottest insider dirt that money can buy. That said, the Q-Machine is in overdrive, with early work on a boatload of upcoming products for your eyes only... The first stop on the Q-Mann's monthly trip into the gaming underworld lands yours truly in Japan where Sega is really ndng high! Not only is Virtua Fighter blowing away Super SF2 Turbo, but Daytona is king of the raceways: The latest virtual entry from the big 'S' is Virtua Cop, sort of a combination of Lethal Enforcers with scaling and zooming: It's kind of simple in concept so it probably will hit the home systems soon. Did I hear someone say 32X? While we're on the subject of Sega, the Quartermann has discovered that Knuckles has escaped from the Sonic 2 and 3 games! Sega will be billing this as the plotline to their new Sonic vs. Knuckles game coming out later this year. My schedule shows a release date of Oct 10th.

...While the 32X and Sega Saturn both utilize the same Hitachi chips, the Q-Mann has learned that the hardware engines are different enough to cause serious software incompatibility problems between the two systems. The Q has heard rumors that Sega knows about this and with their commitment to have all of their systems downwardly compatible, the king of the 16-Bit hill is being forced to either restructure their Saturn to include a whole separate internal 32X engine, or to create another 32X 'add on' adapter which will plug into the Saturn. The Q has also heard rumors that you WON'T be paying for this extra enhancement! How's that? More to come...Excuse me, but how can that new convention be the biggest in the world? They haven't even gotten their first one off the ground - unless you're counting the number of times they've moved the show...

...This just in! SNK has leaked out news that my bud Terry Aki recently picked up in Japan. Evidently, the company is already hard at work on a Neo-Geo CD 2 system! Not bad, considering the first one isn't out yet! This new unit will be designed in the same fashion as the Sega CD2, with the motorized CD tray replaced with a clam-shell manual door. Other cost savings are also rumored to be added to the final product...SNK also has some interesting carts coming our way. Look for what many are already billing as the ultimate fighting game ever! It's called King of Fighters and this mega cart will combine the best characters from World Heroes, Fatal Fury and Art of Fighting - with everybody knocking the sense out of each other in a massive melee never before seen in gaming history! Also look out for Aero Fighters 2 and Agressors of Dark Combat...

...Nintendo is hard at work doing conversions of their more popular titles for the upcoming Ultra 64 machine. While the Q still thinks it sounds like a gasoline ("brytal clear, Amoco Ultra 64..."), this upcoming mega machine is set to debut with some killer names behind it, including Pilot Wings 2 and, of course, a new Mario entry that is rumored to be packed with action, driving, AND flying sequences! Can't wait...Acclaim is moving very quickly to be one of the first third party licensees to bring out Ultra 64 games. Since the Q has discovered from inside sources that they already have an Ultra 64 development system, this should give the house of many labels a good head start on the competition. Look for their first entries to include Turb, based on the Valiant comic book.

...Sources close to yours truly have dished up some dirt on the rumored Hasbro virtual reality system. It looks like the toy giant will be bringing out their headset hardware sometime next year to go head-to-head (so it was a pun, shoot me), with Sony, Sega, Nintendo and other next generation machines. The unit was being shown at a secret closed-door meeting that the Q just happened to walk in on. It was a nice piece of machinery, with a \$299 price tag that, considering you get a helmet with two video monitors ready to blast images into your brain, isn't such a bad deal after all - Is it just me or was the media of True Lies really boring? - Is Sega planning to bring back their 3-D glasses? The Q-Mann has discovered that Ecco 2 will be a 3-D game, but how Sega plans to pull off the 3-D effect remains a mystery to everyone except.

...Terry Aki just phoned (thank goodness for Friends and Family ☺ The Next Generation) to tell me that Virtua Fighters 2 will hit the streets of Tokyo any day with more characters, better graphics, and more polygons...Speaking of Virtua Fighters, Sony's special Play Station press reception in Japan showcased a VF clone. While the Q discovered that Sony isn't responsible for the swipe, it is good enough to give the Saturn sev a run for its money... 'Til next month, the Q tips his hat to Sam M., in the GEM's bottle. Thanks for the support Sam...

## NINTENDO TO BE AT CES INTERACTIVE '95

Less than 48 hours after the plans for the 1995 CES Interactive were announced, one of the biggest players in the video game industry announced their intention to exhibit.

The CES Interactive show will have a total of 300,000 square feet of exhibitor booth space. Since the show was first announced, 24 companies have signed on to exhibit. Those

names include Alias Research, who is working with Nintendo on development technology for the Ultra 64, GTE Interactive, Konami, Naki, Ocean of America, STD Entertainment, Taiko, Time Warner Interactive, and Turner Interactive.

Peter Marin, vice president of marketing at Nintendo of America called the '94 CES their "best show in three years

and we are looking forward to participating in CES Interactive next year in Philadelphia."

It is expected that Nintendo's licensees will also sign on for exhibit space. But, Sega may be absent again next year, as some sources have indicated that they have already reserved space in Orlando for another dealer-only showing.

## VR MKII?

Come September, you'll be feeling a lot more of *Mortal Kombat II* than you might want to.

Pick up an MKII cart and you'll see an Aura Interactor card inside. Likewise, if you buy an Interactor Virtual Reality vest, you'll see an MKII card.

MKII and the Aura Interactor will make for some great game playing!

## NEW TECH FOR ULTRA 64

Using Rambus technology, Nintendo's Ultra 64 machine (scheduled for a fall '95 release) will run at a zippy 500 mhz.

The results on screen will be fast, smooth game play and texture mapping. This is a major leap in technology when you consider that PC systems use processors that are between 30 and 66 mhz.

Howard Lincoln, Nintendo chairman, states, "The addition of Rambus is a significant step. They not only make possible the processing speed we require to give consumers a totally new video game experience, but they deliver that technology at an affordable price."

Be looking for Ultra 64 games to hit an arcade near you this fall.

## SNK'S NEO-CD TO LAND NEXT SPRING!

The amazing NeoGeo CD-ROM system is coming along in its development stages.

We decided to catch up with the system, and there's a few new things that may be of interest.

The system is tentatively scheduled for a spring/summer '95 release. The suggested retail price may be somewhere around \$299. And, we have been told that they are planning 50 titles to be ready at the launch, a

mixture of new releases and older NeoGeo games that have been ported over onto the CD platform.

In other Neo news, *Aero Fighters 2* will soon be around, so be looking for a preview in EGM!

SNK will not abandon their cartridge system, as games are in development for that as well.

If SNK can deliver the goods, many arcade gamers will be in for a pleasant surprise next spring!

## 3DO'S FALL/WINTER GAME PLAN ANNOUNCED

Star Control II gets ported over and re-ramped for the 3DO.

For those of you out there who bought a 3DO when it first came out, you know of the drought in new software titles. But for Christmas this year, you'll be very happy to see what they've got planned. 3DO and their third-party licensees are developing new software as quick as they can.

Slayer is the first Advanced Dungeons & Dragons title for the 3DO, and features a unique randomizer that will make every game different. Monsters, the layout of the mazes, and the puzzles you must solve will all be completely new each time you play. A first-person perspective adds to the game play and over 4 billion dungeons can be created. You'll be armed with weapons and magic, but will you be

Alone in the Dark by Interplay is a new 3DO game that has been ported over from the PC. It involves a horrific world where secrets and evils of Derceto come to life. It takes full advantage of the 3DO's cinematic capabilities for the best play possible.

Kingdom: The Fire Reaches takes you on a quest to retrieve the five pieces of an amulet known as The Hand. The 3DO original is filled with amazing animated cinematics to tell this complex and intriguing story.

board, through tunnels and curves in three stages of fun. No doubt you'll be hearing many a PaTaank!

To satisfy arcade fans everywhere, Super Street Fighter II Turbo will be coming to the 3DO as well. Add to that Samurai Shodown, and you've got a holiday season that is packed with new games. And what we've mentioned here is just a sampling.

Other new titles coming soon include Dragon's Lair II: Time Warp, Duelin' Element, FIFA Soccer, Flashback, Space Pirates, Tatsujin, The Lost Files of Sherlock Holmes, Virtuoso, VR Shifter, and Way of the Warrior. It's definitely going to be a great year!

## 32X AND SATURN

At the CES, we were able to ask a few questions about Sega's 32X and Saturn systems.

Earlier, we reported that Super Space Harner would be released. That title has since been pulled from their 32X development list.

The 32X will not come with a pack-in game, but there will be an unspecified surprise enclosed in the box. We'll have to wait to see what that might be. There may also be a Genesis configuration soon with the 32X hardware built in.

The first titles to be available for the system are Tempo, Doom, Star Wars Arcade, and Virtua Racing Deluxe. More will follow soon after and in time for Christmas.

The 32X will connect to any Genesis configuration, including the CDX and X Eye. So if you bought one of these specialty Genesis configurations, you will not be left out.

As for the Saturn system, Sega of America still won't comment. However, it's possible that the U.S. market will get a totally different configuration of Saturn hardware.

Whether that means they'll change it from being a 32-Bit system has yet to be known. But, they are thinking of changing the Saturn hardware for the U.S. market.

Virtua Racing Deluxe is headed our way as Sega's Saturn hardware.

# ARCADE ACTION

## WING WAR by Sega

Sega has once again tested the limits of the imagination with their latest coin-op wonder. Wing War is an aerial battle game unlike any you've seen before.

Taking its cue from games like Virtua Racing and Virtua Cop, Wing War takes the player to a battle in the skies. The game allows for three viewing perspectives.

including cockpit, rear, and top. Wing War also incorporates a new Automatic View button which enables the player to view the action from an optimum perspective automatically. This excellent feature adds additional realism to this exciting new title.

The game's processor is also a marvel. It has the ability to process surprisingly realistic images at 160,000 polygons per second! This gives the

game a very fluid, lifelike feel. Players also get to pick from eight different lighters ranging from propeller-driven planes to military jets.

If you get a chance, check out Sega's Wing War. The missions are exciting, and not too tough for the average gamer. This game is going to be very popular in arcades!

The graphics are really smooth thanks to the game's awesome processor.

Target the enemies with your gunsights and let them have it with your weapons.

## DARKSTALKERS: THE NIGHT WARRIORS™ by Capcom

Each player has a variety of bizarre and wacky special moves in their arsenal.

Sasquatch shows off his chilling special move—the dreaded Big Snow. Brr!

Capcom has announced the arrival of a new fighting game due to hit the arcades this fall, *Darkstalkers: The Night Warriors™*. This latest brawl-feat looks to be one of the most monstrous (excuse the pun) releases from Capcom yet!

Wrestle off with an opponent, either real or computerized, using some of the most recognizable monsters of all time! You get all of the goodness of a regular fighting game, but with a

sometimes comical twist. Pick between a very unique ensemble of warriors including a vampire, a werewolf, a sasquatch, a zombie, and other notoriously awesome contenders from the late night horror show!

Each contestant has a huge variety of moves including secret moves which can be performed to inflict maximum damage on your opponents. *Darkstalkers* appears to be more of a cartoon-like fighting game than Capcom's *Street Fighter* games—some of the characters' special moves are hilarious to watch—especially the sasquatch's Big Snow move where he

Featuring a six-button controller and a joystick for full-featured game play, this ghoulishly fierce fighting game is sure to appeal to an incredibly large number of arcade-goers. Capcom's *Darkstalkers: The Night Warriors™* should prove to be a big hit!

Huge Bosses like this are a common sight in SNK's Aero Fighters 2!

There's a wide range of pilots to select from. You can even play as a dolphin!

Make sure that you're powered-up so you can annihilate all of the enemies.

Weapon power-ups can be easily obtained by destroying various objects.

Hold on to your seats everybody, Aero Fighters 2 is ready to make a landing at your local arcade! Aero Fighters 2 is the sequel to one of the most popular arcade shooters ever made. Fans of the first installment will definitely not be disappointed. This shoot-'em-up features humor-

ous and Bosses, fantastic graphics, cool special weapons, and an excellent level that will take its toll on your heart! To add to all of this, there's the always welcome option of playing a two-player simultaneous game with a friend!

You can select your pilots and jets.

This immense battleship Boss is a real pain to destroy—so stick with it!

The enemy aircraft come in all shapes and sizes so keep your eyes peeled!

Each pilot has his/her very own special attack. Use it in an emergency!

For even more effective playing, two players can go at it simultaneously.

## INTERNATIONAL NEWS

Yo gamers! This is the 'We-man with the latest scoop from the good ole Land of the Rising Sun! After a wee bit of lag time after the Toy Show, we are now getting a whole slew of killer carts! First on the interesting addit list is that the NEC 32's official name was finally bestowed, the PC-FX.

On the 20th of July, Sony presented a showing of working PlayStation games! First off was Konami hitting it big with Super Parodius, which is said to be a letter-perfect clone of the arcade—and that's not all! Also available on the disk is the original version of the first Parodius! Wow! There was also an incredible-looking Virtua Fighter-type game from a yet unnamed company, and Gundam RX78, a full polygon fighting game from Bandler!

In the regular video game news, Konami has announced that they are hard at work on Goemon 3 (the sequel to Legend of the Mystical Ninja). Also the company Saurus of Japan announced that they are going to produce Art of Fighting 2 for the Super Famicom... That's about it for this ish', but don't forget to check out my best buds Nob and the "Virus" in the pages of EGM's Kocke Kocke!

# STOP THAT ROACH!

Smash 'em with a slipper

Set a trap roaches can't escape from

Victory is sweet!

There's always a chance a video game will make it to market with bugs. In Koei's newest Game Boy title — **Stop That Roach!** — we're making sure our game has lots of bugs (roaches, that is). As either Ken or Lilly, it's your job to battle those nasty critters that have invaded your kitchen and are eating all your snacks.

Pick up the nearest household item, be it a broom or bedroom slipper and smash the bugs flat. But watch out, these roaches have a serious attitude and aren't afraid to fight back! Once you have corralled a group of roaches, lure them into a trap or eliminate them using bug spray. In all, the roaches have 100 different strategies for getting past you and at the food. What are you waiting for? Arm yourself and enter the kitchen swinging. We guarantee you'll find bugs!

- 100 challenging puzzles to solve
- Battle roaches as either Ken or Lilly
- Draw from an arsenal of items including a broom, bedroom slipper and roach trap to combat these pesky bugs
- Swarms of roaches that bite
- Password option allows you to play puzzles you've already solved
- Get helpful hints to plan your next move

### Dotchers

Super Famicom

Action

October

Price: Unknown

The animals of Bumpa Island are suing up for their favorite sport, Dotcher. It is like a free-for-all dodgeball played on a field strewn with obstacles, traps, and handy items. The game design is similar to Bomberman. Unlike Hudson's blastfurners, the characters are not one-hit wonders. As each character absorbs a certain amount of damage, more reckless attacks are possible in Dotchers. There's also no need to duck and hide from your own thrown ball—unless it is deflected back. There are a total of eight characters you can pick from, and each one has its own attributes. Also, this game is multi-player, allowing you to have three friends play with (or against) you as well.

The game is four-player simultaneous with eight characters to choose from.

Similar in looks to Bomberman, Dotchers delivers multi-player fun!

October

Price: Unknown

The sister of the gal who starred in the first game, Hikari Tsurugino takes over the lead spot in this fighting game sequel. Instead of being realistic, the emphasis is on anime cuteness. In addition to a 'magic meter,' there is a unique level-up system similar to the RPG method. The higher the level, the more moves and abilities at your disposal.

The higher the level you become, the more moves available for your use.

After the execution of devastating attacks, goofy reactions soon follow!

Capcom is preparing the sequel to the hot RPG which has just been released here by Square. The lead character this time is a boy named Ryu, the son of the White Dragon who was orphaned long ago. With his partner Boah, they'll set out for adventure!

The quarter-side view is retained with even more detail added to the combat!

The attention to detail really shows in both the adventure and combat sequences!

# IN AEROBIZ SUPERSONIC, EVERYTHING'S BETTER BUT THE FOOD!

At the beginning of the 21st century and competition in the airline industry is heating up. Lower fares, better service and improved flight schedules fuel the war in the skies.

SET UP BOTH DOMESTIC AND INTERNATIONAL ROUTES

PURCHASE TICKETS UP TO 400 AIR SUPERSONIC AIRCRAFT

REVIEW AIRLINES SERVICES AT DESTINATION CITIES

As a young ambitious CEO, it's up to you to make sure your airline is a survivor and not just another casualty. To succeed, you will have to make some tough decisions including where to fly, what aircraft to purchase and how to attract visitors to the cities you service. Your goal: differentiate your airline from the rest while still turning a profit.

In Aerobiz Supersonic, fashion a powerful fleet of aircraft from more than 50 possible choices, organize routes to 88 global destinations and invest your profits in a variety of new services including amusement parks, ski resorts and airport shuttle services.

And don't forget, as CEO you're responsible for things like plane maintenance, advertising and handling those periodic emergencies such as a plane crash or employee strike. Get ready to make some tough decisions! And now that you're CEO, try doing something about the food!

- ▶ Offer air service to over 80 major & minor cities around the globe
- ▶ Select from 4 areas in aviation history including two futuristic scenarios
- ▶ Purchase from an extensive list of aircraft, including historical, futuristic & supersonic airplanes
- ▶ Diversify your airline through business ventures such as golf courses, ski resorts & shuttle services
- ▶ One to four player fun

Action	
Unknown release	Price: Unknown

The main character is Yum Yum, a huge duck or a platypus-like thing (it's ugly in a cute way). Although an RPG, this is strictly played for laughs, so there isn't a princess to rescue or a world to be saved. Instead you get 30 short episodes that are loaded with gags. There are even some shooting games for a challenging break.

Wander through cartoon-like levels filled with funny gags.

**B**ave the fire and flames to rescue innocent people from the towering Metrotech building. Firefighters Danny and Pete must work their way through the burning structure.

Metrotech, a major chemical manufacturer, was holding a Christmas party in their newest office tower. Unfortunately a kitchen fire got out of control, and now the whole place is going up in a blaze.

It's up to you to enter the tower, put out the fire, and save everyone trapped inside.

If you've ever seen the movie *The Towering Inferno*, you know what to expect from this hot, original game.

# THE FIREMEN

The first part of the Metrotech building is perfect for learning how to use your hose. Stopping these early flames is easy. Be prepared: *The Firemen* is a real challenge.

Aside from the quickly crisping floors, mechanical objects have gone haywire.

The danger you go, the more hellish it will get. Can you stand the heat?

DANNY

You play as Danny and Pete, two outstanding firefighters.

PETE

There are many types of fires, and you must figure out the best way to eradicate each one. Some require quick bursts of water, others strong blasts.

Always hit the small fires first, or they'll grow to massive proportions.

The minute you enter the Metrotech building, your life will be in danger.

## THE GOOD

This is a great action game with top-notch graphics. Battling blazes was never so much fun!

## THE BAD

Maybe this game is a bit too simple. There aren't any icons or power-ups—just good clean hosing.

## THE UGLY

Knowing that out there, people are tackling situations like this everyday, I wouldn't want to do it!

## HOSE

Use it all or lose it to lose the flames.

## AME

As the fire has had away the rubble.

## SAVING LIVES

When you find a person, your partner will carry him or her to safety outside. Save everyone if you can!

# THE FIREMEN

## SURVIVING THE FLAMES...

As you progress through the Metroson building, it will become apparent that there's more fire than you can stop. Keep moving, but you don't have to go out of your way to stop each little fire. Will you be able to survive?

## THE MAJOR FLAMES (BOSS)

### BOSS 1

At the end of each level there is a particularly hard-to-kill blaze of fire. These generally spread quickly, and they will do a lot of damage. The best way to stop them is with constant suppression (with water, of course).

This game is based on a popular manga series at Young Jump, a weekly mag intended for high schoolers by the same publisher of Jump, the 400-page manga weekly with circulation of 2 million.

The story revolves around Takada, the head of the high school karate club, and Osaka Soul, the leader of all-youth gangs in Osaka (yes, he's the big cat sold to the film). The player is treated to several of his adventures. Also, another manga fighting game is professed, providing a plethora of special techniques and some super special attacks coupled with many kinds of options.

THE GOOD

The super special attacks are cool, and the ability to regain your health with your "spirit bar" really helps.

THE BAD

The animations of this game are somewhat choppy, and the sounds aren't all that clear.

THE OGLY

Ando

## CHAPTER ONE

Sakuma

The first challenge is by Ando, who is in the school boxing club head out for number one. Once he is defeated, Takaido goes out on a date where he is bested by Sakuma who, when beaten, explains that the youth gangs of neighboring Kobe are trying to wrest control.

Ando has several powerful punch techniques and a ground cracker.

Though he has no projectiles, he is swift and deadly with his kicks.

## CHAPTER TWO

After Takada's ordeal with Ando and Sakuma, he is then approached on the street by a strange monk (named Suanaga) who wields deadly prayer beads (171). After that battle, Ryuryu and Kouryu (twins who fight almost as if they're one) attack. Once these nuisances are disposed of, the final boss of Chapter Two (a vicious rias of muscles by the name of Rick Powered [below]) jumps on you.

Suanaga has several rigid hard attacks and is great with his prayer beads as a weapon!

These twins can perform several combo attacks as well as poornal ones.

Sotokawa

## CHAPTER THREE

Kira

In this chapter, a letter arrives in Osaka for Takaido. It is for a contest to test the might of Takaido in order to see if he can be the next Osaka Soul. After dealing with Sotokawa and Kira, you will encounter Jinrai, who punishes you instantly!

This sub-'n'-de man possesses flash kicks, but he's not that hard.

Kira is a mirror with projectiles and several flash attack abilities.

## AND FURTHER ON...

Don't think we're going to spoil all the fun for you! In later chapters, you will deal with advanced training techniques by the grand master Ko Ryoan (who you'll have to fight). Eventually you take on the Bosses Nakai and Torika. Battle Jinrai, a muscle mass who is one tough customer, in the final conflict.

## NEW SOFT NEWS

Things have been pretty slow as of late. A lot of companies are preparing for the big Christmas season so they can release all of the great games you've read about in these pages for the past few months.

All the systems have a fairly large amount of games coming out for them. While we're waiting for the mega-machine PS-X, the 3DO, and Jaguar have been increasing their libraries.

The 3DO has a really cool game called Retam Fire coming out, and it's massively addictive. The Jaguar has a steady helping of games on the way for its fans. A game called Rayman looks pretty good, and a one-on-one b-ball game based on the movie White Men Can't Jump should be visible soon.

And what's really big news is Samurai Shodown 2! This game features all the old characters, (possibly excluding Tam Tam), and adds new warriors, like an Amazon, and a pew swordsman. This could shape up to be the best fighting game ever!

The Samurai Shodown 2 match will be out in arcades soon!

### Culture Brain

## Galactic Defenders

Super Nintendo

Fighting

Culture Brain is whipping up a brand new fighting game for enthusiasts. There are 15 fighters! Most are your average ho-hum martial artists with the standard set of moves, but what brings this game notice is that some of the warriors aren't all that human. You can play as a mantiscore-like beast, or maybe even a demon war-mo-be. There are also super-deformed versions of some of the fighters from Culture Brain's other fighting game.

As the standard, each fighter has a wide variety of death-dealing moves. Many of special kicks or punches, and others have fireballs too. All the fighters are balanced out, so that no one character is too powerful.

Galactic Defenders sports some pretty decent graphics, too. All the warriors are animated pretty well, and they're drawn with crisp detail.

In terms of game play, this one ranks up there with the best.

Galactic Defenders seems like it's going to be one of the better fighting games of the near future. Culture Brain has got a hot one—look for it.

Your matches will take you all over the world. You will be the strongest.

Play as any of the 15 deadly characters and fight until the end.

The fighters range from martial artists to demon-like beings with superpowers.

Galactic Defenders has fast-paced action with lots of moves.

## Hagane

Super NES

Action

Right now, Hudson Soft is considering bringing out Hagane, an action-packed ninja adventure game. This game lets you assume the role of a souped-up ninja with loads of special techniques. As you travel from level to level, you will go face to face with the deadliest enemies you can imagine. Killer cyborgs, martial artists, and even some unearthly spirits make Hagane a cool action title.

Hopefully this game will come out soon, as Hagane has some of the most intense action around.

Caught between two statues and a Boss who wants your blood, Ouchi!

OH in the distance, a Boss awaits your challenge. Take him out!

The further you progress, the deadlier the traps become. Can you make it?

## Knights of the Sky

Genesis

Simulation

When the first planes were used in battle, the face of war changed forever. Now, with Knights of the Sky, you can relive the battles of those early aerial wars.

In strategic missions, you can direct your planes against the enemy, engage in relentless aerial dogfights, or demolish the enemy troops with bombing runs. Knights of the Sky gives you a number of campaigns ranging in difficulty. You must learn to use your reflexes as well as your mind if you are to make the world safe.

Knights of the Sky utilizes a number of playing fields to give the game a diversified feel. It covers all the aspects of aerial combat. Knights of the Sky is for war fans only.

Engage in dogfights over the ocean with gunfins flying all around you.

Drop your devastating bombs on unsuspecting enemy targets.

## Jurassic Park II

Super NES

Action

Return to the awesome island of Jurassic Park. This cart takes up where the last game left off. A corporation has gone to the park to take it over, and you must stop them.

Unlike the first game, this game for the most part deals in side-scrolling action. This time around, you must face off against humans as well as the terrorizing dinosaurs. There are 16 giant levels to bring you back to the paradise lost of Jurassic Park.

If you loved the first JP, and enjoy a good side-scroller, Jurassic Park II will thrill you. Could this be leading into the next movie? Let's hope so, because this game is hot!

A vicious T-Rex pursues your moving Jeep. Can you keep her away?

Raptors will hunt you down, but this time you are prepared for them.

### Pitfall: The Mayan Adventure

Super NES

Action

Pitfall Harry's back in an all-new adventure that sends him into the ruined civilization of the Mayan Indians. Harry must brave wild animals, magic, and deadly traps. You probably remember the original Atari 2600 game, and the great times you had with it. Believe it or not, the first Pitfall game is hidden inside this cart! It's obvious that he looks 10 times better than the other carts. The pictures below are for the Genesis, but a Super NES version is also on the way. Get set for an adventure!

The temple ruins are fraught with danger. Can you survive the thrills?

Wait for their mouths to close before you jump, otherwise you're lunch.

Speed down a twisting-turning roller coaster track. Watch out for dead ends.

### Super RBI Baseball

Super NES

Sports

For some hot baseball action, you can play Super RBI Baseball. We were given a sneak peek at this game, and it's a lot of fun.

While it uses similar vantage points to other baseball games, this one has extremely smooth animation, and a lot of nice personal touches to it. For example, your coach will give you hand signals. Some of these are really funny looking. Super RBI Baseball is also a good solid game of baseball, where you can get right into it, and delve into the more intricate features later. You can play through a season, or go against a friend. Super RBI Baseball plays well, has lots of stats, and plenty of features that should please even the most hardened couch potato.

Here it is, the classic batting scene. Note all the features found here.

It's a close call, but the nimble runner is safe on the first base.

### Virtual Bart

Super NES

Action

It's just not Bart's day. He's been strapped into a virtual reality machine, and he's stuck assuming the roles of all sorts of wacky beings.

For example, he might turn into a pig. As an onisr, he'll have to escape from a slaughterhouse full of clowns. Or he might have a field day pelting his classmates with tomatoes. Another strange turn of the VR machine sends him behind the wheel in a post-apocalyptic world against the bullies that always taunt him. Bart might even become a dinosaur! Swing around Springfield as Baby Bart too!

Virtual Bart is chock full of Simpson's goodness.

In one of the coolest scenes, Bart goes down a twisting water slide!

Chuck tomatoes at the students, but don't hit the teacher or the officer.

It's Mad Max-type action as Bart must race past those annoying bullies.

Konami

## Contra: The Alien Wars

Game Boy

Action

For the Game Boy, Konami's bringing their hottest action series to the portable format. Just like the Super Nintendo game, this one is exact in every way. In fact, even the scaling of that one plane is intact!

Take on the forces of Red Falcon in a fight to the finish. Collect power-ups, and blaze the entire screen with firepower. Aliens, sentry guns, and other terrors will make this one of the most intense shooters around for the Game Boy.

Contra: The Alien Wars continues the great Contra series, and is done justice on the Game Boy. If you want an exact translation of the Super Nintendo game, then this one is for you. Are you ready to start blasting some alien skeez?!

Aim for the control pod, and destroy it to get past the roadblock.

The alien ship flies by, plunging our hero into a world of flames.

## FIFA Soccer

3DO

Sports

For those of you who enjoy sports games, Electronic Arts has just made one that should turn your head: FIFA Soccer for the 3DO is an impressive, no... make that unbelievable soccer game. Not only does it look realistic, but it plays great as well. You get the feel of truly controlling your team.

FIFA Soccer shows just what can be done on the 3DO. The field scrolls and scales with lots of special effects. The audio is really well done, too.

If you have a 3DO, or if you just like sports, FIFA Soccer is a must-have for your library. This looks like it might just be the best soccer game yet. I can hardly wait to play it!

The goalie can kick the ball an extremely long distance. It's something to try.

FIFA Soccer has some of the best soccer action to be found anywhere!

FIFA Soccer uses a number of great features to bring this sport home.

# SPECIAL FEATURE!

## A long time ago...

Super Return of the Jedi is here and it is the best Star Wars game to date! This game features all of the levels in the movie. In different levels, play as any member of the cast! There are even a few levels on Endor where you take on the role of a cute little Ewok. If you are a fan of the movies, you will find this game exciting and a lot of fun. The graphics, sounds, and game play all combine to make this a truly awesome experience! May The Force be with you!

### Super 3-D

On this level, you will control the guns of the Falcon.

On Endor you will zoom around frantically on speeders.

Target the fighters of the Imperial forces with the sights.

### Players

Every character from the movie has an extensive part to play in this game.

**SUPER STAR WARS**

# RETURN OF THE JEDI

## Jaba's Palace

Now you are in the palace of the mighty Jaba. Before facing him, you have to face every last one of his minions.

Be careful!  
This level is dark and scary.

The Boss at Jaba's palace hops around like a frog while spitting out timer versions of himself.

## Rancor Pit

It is time to fight the evil Rancor, but first you must find him! This level is totally dark except for the glow of Luke's saber surrounding him.

Be careful, because there are enemies in the shadows.

The Rancor is huge! In the dark, it is really hard to see what he is doing. Stay alert. There will be little enemies coming from behind.

Her spin attack not only looks cool, but is very useful.

Be very careful. You will be attacked from all sides!

## Inside Barge

Now you must enter the barge and meet the evil Jaba—face to face. You play this level as the princess.

## Tatooine

As Princess Leia, when dressed as a bounty hunter, run on the hot sand.

When you grab the speed-up icon you move unbelievably fast!

If you find a thermal detonator, you can use it to destroy everyone.

The Boss is a huge robot eye-arm beast. Watch for its lightning.

## Power Generator

On the planet's surface you have to destroy the power generator that runs the shield around the Death Star. Run Princess Leia through the levels while fighting more forces of the Empire. In this level, Leia has a blaster that you can use to shoot through blocks where you will find various power-ups.

## Death Star

The Death Star is the new, mighty space station which is capable of destroying an entire planet with a single powerful blast. Luke must fight his way through the station in order to reach the final showdown against the deadly Darth Vader. This level is full of enemies coming up through the floor. As well, there are a lot of tricky jumps where you are required to leap from falling platforms very quickly.

Use the slash of the awesome lightsaber to take out the Empire's minion.

Right after you slash these robots, they blow up violently. Watch out!

Always keep your weapon in hand. You never know when you'll need it!

## Throne Room

In the infamous Throne Room of the Dark Emperor, you face many dangers. Avoid the cannons and the stormtroopers.

Your jump roll works well here, but be careful not to fall off the platform.

Get in close and slash the turrets with your lightsaber in order to get by.

You can also use your lightsaber to defend against the guns that are all over the level.

Take out as many cannons as you can with your trusty asaber. If you don't get them, they could get you!

## Ewok Village

Welcome to the Ewoks' village. Although cute, they're deadly. Help them fight the bad guys.

Climb up on the tree village while looking for the exit, and fight off the enemies.

This little guy has a really fast and vicious bow and arrow attack.

This level is really big! It seems that when you fall, you just keep on going.

Although the Ewoks are small, they are extremely deadly. Yet, they need your help stopping the Emperor!

## SPECIAL FEATURE!

Primal Rage is a mighty buffet, coming soon to an arcade near you. It includes seven characters, all of which are fantasy or mythological creatures, including various dinosaurs, giant apes, and more. Some unique features of this game (other than the incredible stop-motion animation that makes the game look light years ahead of the competition) are its four-button joystick configuration which is employed instead of the standard five or six we're so used to seeing, and the two-punch and two-kick buttons which feature specially mapped "power hits" that allow for easier to manage special moves and combos. Revision of traditional fighting games don't atop with the joystick configuration, though. The one-

player game does not end after defeating all the characters. At that point the player is thrown into a shorter sequence, a no-room-for-error second round that's sure to make you kick a few arcade cabinets. The Two-player mode is reminiscent of the "push-pull" engine most employed in NeoGeo Fighting games. Best of all, this great new fighting game is scheduled to ship in August.

Almost everything about this game is different. From the Character Selection Screen to the conquest of the new Urth. Even the P.C. "No animals were hurt in the making of this

game." Screen is different! The Primal Rage production team, made up of nearly 30, was organized more like a Hollywood film crew than a typical game design team.

Sauron is what this game was originally intended for—the large yellow Tyrannosaurus Rex with a huge temper. His moves are, for the most part, large and bumbling, but he gets the job done. He really uses his size to his advantage, with such moves as an Earthquake Stomp and the ability to rip with those giant jaws.

## SAURON

## Chaos

Chaos is a wild-haired gorilla who is human-like in a lot of ways. His attacks use his hands and legs to crush the opponent. He can climb on anyone and his fists and feet are equal in strength. He's not afraid to hop around either, as his leaps can easily reach the top of anyone. His power is almost the same as Blizzard, his "brother."

Blizzard is the "Ryu" of the two gorillas. He doesn't have as many leaping abilities as Chaos does—he prefers to sit back and let his power do the talking. That right hook of his is lethal! He's been known to level buildings on a slow day. His stage is set in the Himalayas, and his powers are mostly freezing moves, with freezing breath and more.

## Blizzard

## Talon

Talon is aptly named, as he likes to claw his way into anyone. He is almost a cross between the ferocity of a tiger and the look and intelligence of a Velociraptor. He can leap from long distances and be at your throat in seconds. He is also very agile and has been known to climb up an opponent to reach the head and throat.

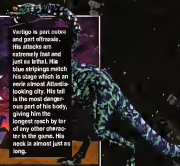

Diablo, the smeller of the T-Rex creature, has a fiery personality and the moves to match. Mostly we have fire breath and his volcanic stage matches the color scheme. Diablo is primarily a fiery crimson red with streaks of black. The patterns are similar to what many scientists think ancient dinosaurs may have looked like.

## Diablo

## Vertigo

Vertigo is part cobra and part offsnake. His attacks are extremely fast and just as lethal. His blue stripes match his stage which is an eerie almost Atlantis-looking city. His tail is the most dangerous part of his body, giving him the longest reach by far of any other character in the game. His neck is almost just as long.

The character of Armadon combines elements of a triceratops, ankylosaurus, and stegosaurus, creating a dinosaur that has very dangerous horns, a somewhat long body, and an almost hunchback aura around him that strikes fear into smaller opponents. He also appears to have a strange pair of eyes due to lack of sunlight.

## Armadon

# The Making of:

# PRIMAL RAGE

**Dennis Harper:**  
Producer

Originated the idea of a stop-motion dinosaur fighting game over two years ago. Originally conceived as a showcase for two ferocious T-Rexes, the puppets looked so incredible, they expanded their original idea, and made seven new ones.

**Jason Leong:**  
Animator

Had an idea for a revolutionary dinosaur fighting game, at the same time Dennis Harper did, and went into business with him. They were both certain that the stop-motion process had never been attempted on this scale for a video game.

The intense process starts with creating the actual puppet.

A plaster mold is made of the desired shape.

The heart of the puppet is the flexible endo-skeleton.

The skeleton and mold is then injected with whipped latex.

The whipped latex mold is placed in a special oven.

Last of all, the latex puppet is painted by an airbrush artist.

This is the result—some of the best arcade graphics ever!

The game features seven characters with special moves.

The cast includes many strange characters, mostly dinosaurs.

There's even a little "Finishing Move" action going on!

Now that Icoeman's back, Jacques is pursuing other interests. I guess he can stay around here and give Icoeman some challenge on the upcoming games. Yeah right! So put on your reading glasses and see the hottest new sports games that have been reviewed and previewed by EGM's finest sports guru. Enjoy!

## SEGA'S ALL-NEW NFL '95

As I expected, Sega is now releasing another NFL game. Like the other versions, NFL '95 has some

great features that will gain sports gamers' attention. The major feature that will change, however, is the visual perspective of the playing field. In the previous version when you start a play you can only see approximately 30 yards of

the playing field. When you drop back as the QB, the camera angle will rise and you'll be able to see up to 85 yards down the field, allowing you to view your

receivers in motion. While all of this action is happening, the players on the field scale as they move.

When you pass the ball, the camera angle will drop again while the ball is in the air and return to its original angle when your receiver catches the ball. You have to see it to believe it!

There are other features that stand out in this game as well. Create your own players, trade, and even revise the team's depth chart. Other options (free agents, records, injuries, stats, league leaders, instant replay, and many more) are also at your disposal. You can even play with up to four players at the same time. With all of these features you'll need a battery back-up (it's included!). Look for this one to come out kicking soon.

## PREVIEWS AND REVIEWS

Out of my way punk! See some real-time action on Sory's National Hockey Night.

Check out the latest preview pics of upcoming games as well as the reviews that Rookie and I have compiled. See if you agree or disagree with us. Here are the games that you'll be seeing in the following pages: Nintendo's Cup, Elite Soccer for the Super NES, ESPN Football, ESPN Hockey, GP-1 Rapid Stream, Acme All-Stars, and lastly, Elite Soccer for the Game Boy.

## ARENA FOOTBALL ... WELCOME TO THE HOUSE OF PAIN!

Arena Football—football played indoors where the field is smaller but the pain is just as intense. The regulations have been changed a bit to add excitement and fast-paced action. This great new sport has gained popularity across the nation. As a treat, V-Real Interactive will be releasing V-Real Arena Football for the Jaguar. As you can see by the

screen shot, the action is taken from the real game. The Jaguar has many capabilities and this one should look great when it is finished.

Team EGM will have more inside pics on this new game soon.

bikes that Cannondale produces. In this racing game, you will be able to choose from a variety of bikes each varying in road performance aspects like: speed, traction, handling, and so forth. Pick an off-road-type bike to get you through those muddy tracks and don't forget about the all-suspension bike.

All the tracks vary as well. You can start at the bottom and race through the qualifying track and see how you do

against the very best riders around. After that you can attack the harder tracks, if you're good enough. Conserve your energy on the hills by putting your head down to decrease air friction. You can either grab or lock the other riders to get ahead of the pack. Hey, it's survival of the fittest out there! That's what this game is all about. You snooze, you lose.

Still having a problem keeping up? Grab someone to conserve your energy.

# ELITE SOCCER

## OOOOAAAL KICK!

Play in the World Cup. See where your team stands after the early rounds.

### HAVE A FRIEND?

The exciting part about this game is that you can play against another player instead of the computer. Just hook up another controller, and boom—you're set. Plus, playing against the computer can get easy at times and the challenge is scratch-off. So, get with it and invite a friend over for some real action!

As World Cup Soccer fever rages, the competition to make the best soccer game continues, too. Elite Soccer from Gametek is a cart to look for in the future.

There are so many options you can pick from, such as changing the weather conditions, the referee's style of regulating, the goalie's skills, and whether to play indoor or outdoor, among others.

Shoot it out, and decide which team will advance to the tournament.

If you want some competition, enter the World Cup Mode and play against the very best in the world. Go through the rounds to see where you stand. Play in existing fields where they show you the size and capacity of the stadium, and where it is taking place.

Elite Soccer may not be as flashy as other soccer games, but it delivers some great features that make it worthy.

The real new features are something to look forward to. This is actually an okay game, but the players on the field move like flies! Their movements are too quick to handle. This odd movement and of takes away from the game. The graphics are up to par, but not that overwhelming. This one is alright, but not outstanding.

I agree with lobster. The players on the field look like flies trying to find food. It was frustrating. To either watch the World Cup then look at flies. Being able to choose from the many options is a plus. The referee is really strange. The only real good play. Cool sequence of the shootout. It may not be great, but it's really in okay terms.

At half-time he will be there (ESPN Sports Center) to give an in-depth look of the current game being played, showing you all the stats and scores.

ESPN Sunday Night NFL looks average, but it does have some originality on its side. First of all, pick from various types of plays as well as audibles on the field. You will have to learn the plays that ESPN has offered to defeat your opponents on the field. Do special running abilities like hurdle, spin, and jump to pass the defenders ahead of you. These

# SPACE CAMP

## A Space

If you win the Rebel Assault Contest, you'll be flown to Space Camp to begin training as a Rebel Assault Cadet! You'll learn general astronaut training, lasting between three days and one week.

The things that you will experience at Space Camp will open you up to the fun of learning about space travel and aerospace technology. You'll experience what it's like to be weightless, and what it's like to be involved in a real launch.

Experience the rush as a member of shuttle crew or mission control.

Level One is a five-day mission for those who are in grades

7-9. You are divided into two, 10 member teams to discover new technology and study environmental topics.

To experience the feeling of weightlessness, you'll use a simulator like the 18th Gravity Chair, and the 5 Degrees of Freedom trainer. In a simulated weightless environment, you'll work on the Zero "G" Wall as a mission specialist. Ever capture a satellite? With Extra-Vehicular Activity, you'll get to witness it all hands-on.

Special IMAX projection films like *The Dream is Alive*, *Blue Planet*, and

*To Fly* will teach you more about a mission into space.

When you've learned how it all runs, it's time to get ready for two missions, using critical teamwork elements to successfully launch, dock with a space station, and return to Earth unharmed.

Level II is an eight day mission for grades 10-12, mixing classroom learning and hands-on training. This level has three tracks of study which students may choose from: Space Science, Engineering, and Aerospace.

In the Space Science track, become a payload specialist, conducting experiments on the shuttle and station simulators. SCUBA training will help you conduct experiments in the "microgravity" of the space station.

The Engineering Track lets you go hands-on to conduct EVAs, and perform a number of tasks using the Zero "G" Wall. Learn robotics, optics, engineering fields, and what it takes to accomplish tasks while in space.

The Aerospace Track focuses on the educational requirements needed for a

career in aerospace engineering, shuttle command, shuttle pilot, or aviation professional. Exercises in different Mission Operations and Control Room scenarios will help you become acquainted with the knowledge needed for a career in aerospace.

The Parent & Child program is a three-day mission for ages 7-11 and a parent. In this program, you will learn about the history, present, and future of space flight. Tour NASA facilities, listen to speakers, and experience astronaut simulators.

All three of the above mentioned programs include one thing: the fun of discovering space. No doubt you've seen the shuttle launches on TV, now you can study what allows these to take place, and you can have the pride of knowing what's going on in one of these complicated launches.

At Space Camp, you'll familiarize yourself with the technology and experience to become the world's next astronaut. After experiencing this awesome program, you could prepare for a career in aerospace. The Space Camp program gives you the chance to experience things that you would never get to normally. Space Camp is something you'll remember for a lifetime!

# CIRCUS MYSTERY

**Starring Mickey & Minnie**

**T**he Great Circus Mystery is a new game by Capcom that stars Mickey and Minnie. The rest of the cast are also present in this all-star presentation. The world's two most famous mice are on their way to the circus when something

goes wrong. As they try to piece together what caused the cracks at the circus, they get started on a journey that is more than they bargained for. As they go through the game they will get different suits that will give them special abilities. You can change suits at any given time during the game to get past certain parts.

## Level 1

Something has happened at the circus and Mickey and Minnie are off on an adventure to find out what caused the commotion.

The Lion Boss juggles fire that he throws at you.

This is the huge Lion Boss. Don't touch it. Feed when his hair is spinning.

In your regular outfit you can stomp on enemies, then pick them up and throw them.

## Level 2

Now Mickey is in the jungle and he acquires a new suit that will help him out. It lets him walk on walls and swing on hooks.

Jump on the heads of the snakes to stun them. Then you can climb them.

The Boss of this level is a big monkey. Wait for him to stop rolling then jump on his head.

## Level 3

Ride through the mansion shooting pesky ghosts with your cork gun!

In this part of the level you will run up, over, and around obstacles.

If you use your hook on the lamp the whole screen will rotate.

The Vacuum Suit will blow out the candles, then you can step on them.

The Dinosaur Suit will send little creatures after you. Use the cork gun.

The Ghost Boss is really easy to beat. Shoot him when he first appears.

## Level 4

Much of this level is done under water. Swim from bubble to bubble to avoid losing health.

The Dinosaur Suit will send little creatures after you. Use the cork gun.

## Level 5

Now you are in the snow caves. Use the hook to get past the spikes.

The Boss will try to freeze you before he hits you with lightning. Use the vacuum.

## SUITS

In the Honey Suit you can slide and shove.

In the Barrel Suit you can climb and slide.

The Vacuum Suit lets you suck up enemies.

In your regular Suit you can throw items.

badder than ever! One afternoon while doing what they do best, watching TV, they see that Gwar is coming to their town. Bound and determined to go to the concert, they decide that if they do lots of cool things Gwar will let them into the concert free. They waste

no time getting started, either. At the beginning of the game you decide where to go first by choosing the TV channels. Once you are there you must keep them alive and evade a lot of different enemies. At the Turbo Mall 2000 you can search for change and then play two different sub-games.

Push Beavis around in a shopping cart while he shoots zombies with grass.

## TURBO MALL 2000

When you enter the mall the first challenge you come across is the pet store.

Jump over the dog. You can now grab the bat and do with it what you will.

The snakes at the pet store haven't been fed. Don't get eaten!

Have a little fun by turning around and slipping Beavis!

Watch out for all the guys on skateboards. They move fast!

## HIGHLAND HIGH

You are now at school—the very best place to wreak havoc! Watch out for the guy kicking lockers open and the skateboarders.

You can pick up a gun and shoot the enemies that pop up out of howlers.

Pick a Chicken Fight with these two guys at the end of a level.

After the fight, go back to the house to choose another level.

Bub-head pushes Berriis on a gurney. Pick up LV, legs to get ammo.

They really don't have a clue! Just look at the X-ray!

Use the ball to take out the shopping cart and the big dog.

First the sewer lid flies off and then an alligator comes out to get you.

Remember, when you Couch Fish you must avoid the old lady and the dog.

## HOSPITAL

At the hospital Berriis and Bub-head are bound to get into more mischief. Search the vending machines for change.

## ON THE STREETS

Run around the town doing cool stuff and cause as much trouble as possible.

The dogs on this level are everywhere! Be sure to avoid them.

Jump from lamp to lamp but don't fall onto an operating table.

At the end of this level you have to battle the crazy nurse.

Here you have to jump from clothesline to clothesline to dodge the mutant!

As if avoiding the crazies weren't enough, you also have to watch out for rakes!

## COUCH FISHING!

After every level you can choose to play a level of Couch Fishing. Move your hook around to try to catch things like cheeseburgers and ice cream cones. Just try not to catch the old lady or the dog.

### THE GOOD

Fans of the show will enjoy the chance to play as the popular pair.

### THE BAD

This game is full of cheap hits that you just can't avoid.

### THE ONLY

Okay, one cheap hit I can deal with, but when one pushes you into another it becomes really annoying.

You will find guides like this that will instruct you on how to control new things like a hang glider.

The game control is very weird. You make Pac-Man move around by shooting things with a singhpot. That draws his attention to it. Or, you press Y and a direction and he will lock that way. To help you understand, Pac-Man will teach you in the beginning.

This is the entire Pac-Man world. You can't go everywhere at once, but you will earn passes to move on.

Here we have a truly unique video game. Pac-Man 2 definitely changes the way a normal game is played. The game is played in first-person perspective. You don't actually "control" Pac-Man, instead you guide him through a bunch of different levels. Plus you can even get him to fly a hang glider, ride in a mining cart, and go skateboarding. When Pac-Man is really happy he'll listen to every order given and try to do them to the best of his abilities. But if he is

unhappy or sad, he won't do a darn thing you tell him. Once that happens, you must find him some food or something for him to look at that will make him happy. The ghosts are all over the place. However, power pellets are scattered everywhere for you to eat in order to stop the ghosts. There are tons of different animations that Pac-Man will perform. I guarantee you that 98 percent of the animations will make you laugh.

# PAC-MAN 2

## THE NEW ADVENTURES

This evil Ghost witch is behind all the troubles you encounter. She gets really mad every time you defeat the ghosts and tries even harder the next time to totally trip up Pac-Man's plans to save Pac-Land!

The original Pac-Man game that was so popular in 1980 now can be played again in its nostalgic form. Everything remains the same, including graphics, sound effects, and those stupid ghosts.

The original Ms. Pac-Man which came out in 1982, was a mega success as a sequel. It can also be played in its true form, but you have to earn the right to play it by feeding the three parts of the cartridge.

This is your item guide. Pac-Man gives a little explanation for everything in your inventory. If you pause for too long, Pac-Man gets mad.

### THE GOOD

This game has so many funny animations, you'll laugh until your side hurts or till the ghosties get to you.

### THE BAD

You can get frustrated very easily. If Pac gets mad, he won't follow your instructions.

### THE DOLY

Watching the poor, hungry alley cat beat the bloody #0 "I" out Pac-Man for his hot dog.

First things first. Ms. Pac-Man tells you that the baby is still hungry. Go out and find Pac-Baby a bottle and some milk to feed his empty stomach.

After the raven leaves, pick up the bottle and go by the cow. Pac-Man will fill up the bottle and you can return home.

Leave Pac-Man's house and walk to the right. You will see a milk bottle that you just can't reach.

The next thing you must do is to go to the mountain and pick Lucy (Pac-Man, Jr.'s friend) a flower for her birthday.

Shoot the raven with your slingshot to scare it away. The raven then flies at Pac-Man, scaring him, but also knocking the bottle off for Pac to grab.

With the ropeless pass that Ms. Pac-Man gives you, go to the mountain and find Lucy's precious flower.

The hang gliding sequence is really cool. Tell Pac when to go higher or lower.

If you land this flower on the mountain, you are guaranteed to make Lucy one happy little girl.

There will often be ropes you must climb to go elsewhere. Just have Pac-Man look up at the ropes to make him climb.

Pac-Man is pretty scared of hang gliding. You must see to it that he gets on that glider. If Pac-Man is too scared or depressed, he won't fly. When you get here, make sure he is very happy.

In the third level of the game the gremlins have stolen Jonas's guitar and you must get it back.

So many ropes to choose from. Some give you items while some make you fall a level.

# BUBSY II

## THE ORIGINAL BOBAC!

The original Bubsy game was very successful and remains a Nintendo classic today.

In Bubsy the Bobcat's first adventure, Claws Encounters of the Furred Kind, our Bobcat was pitted against every kind of enemy that you could think of! Now Bubsy's back and ready for more action!

## TWO-PLAYER FUN!

Two players can team up on the one with a style reminiscent of Sonic 2.

Using the warp loop is a great way to get out of any stage without having to reset all of your record so far.

Bubsy must defeat all the stages in each floor to activate the portal which leads to the floor guardian.

## THE GOOD

This game has many in-depth levels as well as bonus levels, adding to the replay value.

## THE BAD

Bubsy's life meter could have been a little more accurate than just being a picture of his mug.

## THE DOLY

That Bubsy jingle that plays in the beginning! Arrrrrgh!

## BUBSY'S BODACIOUS ATTACKS!

### BUMP

### GLIDE

### Floor Boss

Don't stare too long at the beautiful background here or else Bubby will become very irritable.

Although complex levels are a plus to any game, it's also easier to become lost!

Poor Bubby's going to be sore in the morning! Fortunately the fire pits don't hurt our bobcat.

If you happen to see a lion head, give it a push and it may open up to reveal a secret well close by!

At the end of the east wing on the first floor, Bubby must battle a giant pig boss. Jump on his helmet to defeat him or else he'll try to pin you against the ceiling!

If you remember that there is a way to get to any hidden room or item you see, you'll soon be rewarded!

The only thing that these snarling statues will display is their shame after you defeat the final Boss!

Be sure to search everywhere! There are tons of special items and hidden games to be found!

Whoa! That was too close! Take your time or else this might happen to you.

As soon as you see this crane-like statue, jump for it! Otherwise you'll be in for a swim.

Although it may be tempting, don't follow all the streams of water to see where they go!

## THE DARK SIDE OF THE TOMB

The tomb is filled with traps just to keep you on your toes. One false step, though, and it's bye, bye Bubby!

**R**-Type III The Third Lightning is finally coming to the States courtesy of the folks at Jaleco. In this installment of the popular series, you will witness awesome sound effects, intense graphics, and some totally unbelievable Mode 7 scenes! This shooter has everything you could ask for and a whole lot more. Now you can equip your ship with three different types of force pods, giving you more choices than ever before. Each pod is unique and different from one another when powered up. There is also a sound test so you can hear the great sounds without the enemies.

### THE GOOD

This is the perfect shooter! The graphics and sounds along with the guns and game play make this great.

### THE BAD

This game, like all good shooters, is very challenging and a little hard—maybe a little too hard.

### THE ONLY

Since the game plays so well, you have nothing and no one to blame but yourself when you die!

## ROUND

These guys come out of the background very quickly. Have a blast ready for them.

## SHADOW

## Level I

## CYCLONE

This guy was really tough to beat, until he forgot to look where he was going!

The space station you are flying through uses thrusters to spin.

When the station starts to spin be alert for the huge laser from the middle.

This part is hard but it doesn't last very long. Try to hold out long enough to get through it.

Charge up a hyper blast to hit the Boss when he gets close to you.

When you come up through the floor, have a hyper beam ready.

## Level 2

There is not much room to move around in this level so keep your movements very precise.

The Boss can only be hit when its eyes are open.

The enemies are everywhere and the action is really intense!

## Level 3

Use your pods to hit the Boss when it jumps off of the walls.

This level scrolls both horizontally and vertically making it really tough on you.

Going up at this part of the level is challenging, and a little tense.

Again the passages are really tight so hold it steady and you'll be okay.

The yellow walls come slamming down in front of you very fast.

## Level 4

With all of the explosions, it's hard to keep track of what's up.

Don't go too fast or you'll get caught in the yellow doors.

Get through the wells before they shut you out.

This is the hardest part. Learn the pattern of the lasers.

Just keep shooting the Boss—he'll die eventually.

## HELP FROM OTHERS

### DEFENSE DIBBLE

THIS WILL ASSIST YOU.

One of these is found on each planet, and they are programmed to help the MBS. When you find a defense unit, it will follow your ship and attack nearby enemies.

# VORTEX

**B**erbans from the Aki-Du system have stormed the Deaberon Capital of Trantor via an interdimensional Vortex, and have seized control of the capital city, Trantor, and the powerful AI Core that defends the peaceful Deaberon world. Unable to destroy the AI intelligence, the dreaded Black Troop Generals removed the Core from its housing and hid the four data banks and the control Core on their own heavily defended wasteland planets. It's up to you, as the pilot of a robot (known only as "Morphing Battle System") to reclaim these data banks and restore the AI Core. Use your extraordinary transforming abilities that allow you to become a Sonic Jet, a Landburner, a Walker, or a Hard Shell to compensate for the varying terrains of the planets, from the frigid Cryston, to the scorching Magmema. You will combat the Black Troop's vicious guardsmen with your vast array of rockets, cannons, lasers, and missiles. Even if you are skilled enough to reclaim the data banks, you must return through the dimensional gateway to Trantor, to face the Black Troop Master in the most brutal battle ever!

## BATTLE SYSTEMS OF THE MBS

### WALKER

The main MBS shape. It's designed for exploration and defense.

### SONIC JET

A jet aircraft that allows the MBS to fly to areas that are inaccessible.

### LAND BURNER

A low-wheeled car capable of very high speeds, making it hard to control.

### HARD SHELL

A defensive weapon. Damage is taken through fuel tanks and not shields.

### THE GOOD

Cool transformations into the many forms add a lot of variety to this science fiction game.

### THE BAD

At times it's hard to make out where an enemy is because of all the polygons.

### THE UGLY

Switching between the different Transformation Modes is a bit confusing. It should have been easier.

Lt. Dante, who pilots the mother ship, will drop you off in an enemy-infested area.

When you pause the game, a view screen appears to show how far in the level you are.

Be careful not to let enemies get too close. It's hard to dodge their shots.

If you don't destroy an enemy early, they'll gang up on you—then you're in trouble.

Use your targeting system and lock on to an enemy. Fire your missiles when ready.

## LOOK OUT! THERE'S A BIG, BAD, MEAN BOSS AHEAD!

Hey look! There's a big and ugly Boss far off in the distance. You better watch out!

Transform into the Hard Shell Mode and use the super-powerful electrobeam!

Unload all your missiles on the Boss and spray him with all you can muster!

## ENEMY OVERLOAD AND SOME BAD PILOTING CAN COST YOU YOUR LIFE!

Enter the realm of the Spiral Arm where a millennia ago, a dedicated band of five outcast heroes called FireTeam Rogue are all that stand between the evil Umbran empire and its diabolical plans for the Dark Tails of Kangor Thrang—the ultimate weapon of destruction.

The FireTeam Rogue genre deals heavily with the use of the technology derivative of the Tails, a crystal from the Spiral Arm. A gift from the Anan, ancient beings who have seemingly vanished from known space, Tails technology is simple to use, but varied in its almost infinite applications.

This technology is seen in everyday providing simple services such as lighting a room. However, this technology may be used for the creation of weaponry as well. It is this technology which forged the Dark Tails of Kangor Thrang, a world destructive weapon FTR must protect.

# CIVILIZATION

**C**ivilization is a strategy game that puts you in the age of 4,000 B.C. Create a brand new civilization starting from the ground. You are given two sets of settlers and are expected to build an entire empire out of it. That is no easy task! You have a title over 6,000 years to try and accomplish one of three things: World domination, build your empire and destroy the rest of the world, Space Exploration, be the first one to build a spacecraft and successfully land on Alpha Centauri, stand the test of time. Survive the 6,000 years without being taken over by a possibly more powerful enemy. This game will appease anybody who loves strategy games and will challenge even those who think they can rule

There are lots of different options that you use to control the events of the game. The ones I have pictured are the View Options which allows you to see your city, the Jump Option which allows you to jump to any city you own, and the Production Option which is where you control what items a particular city is producing.

## THE GOOD

This game sets a standard on how much fun strategy games are to play.

## THE BAD

Civilization is so addictive, you won't want to eat, sleep, or do anything which makes you leave the TV.

## THE DOLY

Things will get pretty ugly when you lose your job because you're home playing this game.

Once you have established a couple cities, have your people make some military units so you can explore your continent (right). Once you have the technology to build ships, use it to explore other continents and get a general idea of your enemies' territories. Land some military units and have them explore the land area of your enemies.

You start out with two settlers. Use them to irrigate land and make your first cities.

The first city you build will be your capital. Keep your capital off the shore and put it on a river to avoid enemy attacks later on.

Attack your enemies when you have enough troops built up and when you can make ships like the frigates or ironclads. Make sure you can last in a war with your enemies or you'll be open for an attack.

Your scientists will discover new technologies all the time. The cool part is, you get to choose what new advances they'll discover. You can even steal or trade technologies with your enemies.

FROM THE CREATORS OF THE 7TH SAGA...

## BRAIN LORD

Strange visions crowd my mind...  
Reality or Dream?

This place seems to go on forever.  
There must be a way out...

The door is locked! I can't get out!  
I guess this is it... So or BE THE!

My father is dead. Everyone thought he was crazy. I didn't.

He believed that long ago, men rode the skies on the backs of dragons. They were called Dragon Warriors. Now, all the dragons have vanished. My father spent his lifetime searching for dragons... a life spent in vain. Now, I am the only descendant left. It is up to me to find the missing dragons.

They say only the gifted can unlock the secrets of the enry mazes that lie before me. "If you don't go crazy, you'll go insane." Whatever that means. It has been thousands of years since anyone has seen the dragons. I doubt I will live that long. I have a scrap of paper someone placed in my pack. I wish I knew who left it. Only one line is written: "Are you a Brain Lord?"

I hope so...

**STAGE ONE COLLECT INTELLIGENCE**

Run through an enemy base, kerblasting the grunts as they come by. This one's easy—just collect all the loots and power-ups that come by and you're set.

**STAGE TWO LOCATE AMMO TRANSPORTATION**

Jog along, toting your weapon, filling your opponents full of lead. Unfortunately, every so often they get down to business with a tank or other large weapon.

**STAGE THREE PROCEED TO THE HQ**

Hop in a boat and take off on your way to the HQ. Things get serious with a variety of war machines between you and your goal. Avoid the missiles if you can!

**F**light 005 of Global Airways, enroute to Athens, Greece from Montreal, Canada, was commandeered by the forces of Abdul Bazzam, General and Helong president of the British People's Republic. All passengers on that flight are now considered hostages of Bazzam and the Republic, and are being used in forced negotiations to get prisoners from the Republic in Germany and Franco released. This, of course, makes some people rather upset, hence Operation Thunderbolt rescue the hostages.

**OPERATION THUNDERBOLT**

Monitor your meters. Displayed here are your ammunition stores as well as your life meter.

Are you ready for the intense action ahead? Check out the cool cinemas between certain areas.

Select your method of destruction. This cart is compatible with the Super NES Mouse and Super Scope 6, as well as the controller.

Choose from several characters, each dedicated to following the orders of the commanding officer of the Operation Thunderbolt team.

**THE GOOD**  
I like the idea of being able to choose from a selection of different grunts. Nice touch.

**THE BAD**  
It seems that the firefights are way too overdone. Sure, I can survive a couple direct missile hits. Not!

**THE DGLY**  
It's not a pretty sight when you've taken five or 10 too many grenade hits. Can you say, "GAME OVER"?

## Bonus Stage

In typical Sonic tradition, the Bonus Stages here are unique and completely different from each other. You must rotate around the spheres and try to launch yourself onto the higher spheres. Your main obstacle is a flexing ribbon that follows you throughout the stage. If it hits Sonic or Knuckles, the Bonus Stage is over.

**S**onic's back and this time, he has brought along someone new for the trip. Knuckles! Sonic & Knuckles is the latest action game starring our familiar friend. As reported back in the June 1994 issue of EGM, Sonic & Knuckles is the add-on cart that plugs in-between the Sonic 3 cartridge and the Genesis. This activates more levels and features that weren't found in the previous cartridge. The most noticeable feature is that you can play as Knuckles the Echidna. What's an Echidna, you ask? It's an egg-laying mammal with a shiny coat, slender snout, and a sticky tongue for

catching insects. Sounds like a cool mascot to me! Anyway, Sonic & Knuckles features all new levels and new techniques like Knuckles' gliding and wall climbing abilities. Plus, Sonic still has his blistering speed and spin-dash abilities.

There are also new items to interact with throughout the game, such as a manual crank to climb up ledges and flower umbrellas that allow you to float to the ground safely. All this and more add up to yet another exciting adventure in the world of Sonic the Hedgehog. This add-on cartridge should breathe some new life into the Sonic genre.

is next

## Mushroom Hill Zone

The adventure begins in the land known as the Mushroom Hill Zone. Here is where Sonic and/or Knuckles can see what the levels have in store for them. Practice Knuckles' high-flyin' gliding technique and his wall-climbing skills. Of course, what Sonic gains would be complete without 360 degree loops? The most interesting part of this level is the weather control station that constantly alters the environment from a warm, summer setting to a frosty winter environment. Dare to be different, I guess.

Bounce on enemies in the traditional style to destroy their mech suits.

Knuckles uses the mechanical lift to reach new heights in this large stage.

Robotnik is back! Dash his machine while jumping over the spikes in the columns.

## New Techniques

Not only is Knuckles a cool, new character, but he has some abilities that Sonic could only dream of. Try his wall climb or glide technique to explore new areas.

Sonic blazes through the loop with the style and finesse that made him famous.

### THE GOOD

Knuckles is a nice addition to the game and has some cool techniques to break up the monotony.

### THE BAD

It's more Sonic. Again.

### THE UGLY

Dr. Robotnik. Hasn't this guy had enough by now?

Once you finish the level, jump on the button to set your waaaaal buddies free.

Here's a look at the Flying Battery Zone. Take to the skies for another battle.

Our side buddy Sparkster is back again on the Sega Genesis format. In this sequel, Rocket Knight Adventures 2, Sparkster is fighting against knights instead of pigs. Other than that, this game still has the familiar Sparkster feel to it. You must use your agility and spin attack to plow your way through various stages lighting anything from machinery to monster bees. In order to dominate the game, you must use a combination of quick wits and ingenuity, because some of the Mid-Bosses require certain attacks to kill them. Sparkster includes some very good animation and cool-looking enemies. If you were a fan of the original Rocket Knight Adventures, play this sequel, and you won't be disappointed. Be warned, it's addictive!

Use the roll attack to defeat charging enemies. It definitely comes in handy when cornered!

When facing multiple enemies, use this charge attack to plow through a number of nasties.

The sword is the basic attack of Sparkster, but can be used in almost any situation!

After picking up the fire icon, you receive the fire sword, which is more powerful than the sword.

## POWER-UP ICONS!

Sparkster's adventures can be made much easier by finding and utilizing these power-up icons scattered throughout the levels.

Worth 20% of life meter!

Powers up your sword!

Worth a power-up!

10 gems equal one roll!

Powers up your rocket!

## THE NASTIES

These quick lizards emerge out of rocks and other places, so stay on your toes!

This is the lizard's mean machine. It takes quite a few hits to destroy it!

## EGM X-TRA DARE TO COMPARE

A LOOK AT OTHER FORMATS...

Take a look at the first Rocket Knight Adventure on the top. Whoa! Deja Vu! Konami kept our little Sparkster looking the same in the sequel. The game even controls the same. Take a look for yourself and see!

## STAGE 1

Watch out for your lizard foes popping out of the rocks and attacking you!

Use your dash abilities to search the skies for valuable gems and power-ups!

To beat these annoying robots, you must use your spin attack quite a few times!

## STAGE 2

The outsize of self-ignite bombs and debris, so watch your step!

Spin attack the knob to open doors to various areas!

Pay attention to these signs to know where to venture next!

To pass through this machine you must diamond it!

## STAGE 3 BOSS

In order to kill this Boss, you must use the blindest the little critters are holding for you. When the Boss spies, he is invincible. You must wait until he's stationary and hit him on his head. When he's hit, he might release power-ups, such as apples, meat, etc. Good luck with this Boss, he's a tough one!

## STAGE 3

The wires come at you from any angle, so use your agility!

Watch at the bombs in the corner before they throw their bombs!

The purple slime stops you from dashing, so shake it off!

Goop My! Fire in the nose when his arms are outstretched.

### THE GOOD

The game has definite replay value. The graphics and sounds are clean.

### THE BAD

What's with the mandatory hits?! I can't stand being hit with vines from every angle!

### THE UGLY

Purple slime that sticks to your back! If you try to shake it off, you get more stuck to you! Frustrating!

**A** worm is hiding in the hole, trying to escape a hungry crow. Wandering if it is safe for him to come out, he sticks his head out. He looks left and right, unaware of a suit falling from the sky. By the time the worm sees the suit coming, it is too late to get out of the way. The suit lands on top of him, completely covering his body. A strange interaction of the worm's flesh and the suit's particles creates a mutation of the worm's body and brain, transforming him into "Earthworm Jim." The suit has come from a battle in space where Psy-Crow is trying to retrieve a stolen out. Amidst the chaos, the suit gets lost and

falls to Earth. Psy-Crow goes to Earth and sees Jim and the suit, and thus begins the chase.

Find these continue icons all around the game. If you touch one, you can continue from that point should you die. So, either find these icons or don't die through the entire game!

## Level 1-New Junk City

Level 1 is really easy to get through. As easy as it is, it does teach you the controls and gives you some basic skills like using your whip to swing around, to climbing up on ledges that are too high for Jim to jump on.

You will find this moosehead in the first level. Use your whip to grab onto his antler, swing up to an unreachable ledge, and find a hidden area check full of items.

Your trusty gun will always be at your side. However, ammunition will not!

Your ammo supplies drop pretty rapidly. There is, fortunately, lots of ammo lying around. Make sure you grab all of it.

This is the Boss of Level 1. He'll spit fish at you while a magnet drops crates and horns on you. Whip the crates onto the spring to launch them up at your foe.

Earthworm Jim has many different animations when he wanders still. They're all hilarious.

Use these pulleys to jump up to the ledge and receive some of your super-powered gun blasts.

This fire trail is hot on your heels. Run as fast as you can and jump at the top to avoid being licked by the fire.

The bonus game pits you against Pay-Crow in a fierce race to get out of the hole first.

When you run on this gem, that causes it to rise, allowing you to get higher up in the level.

Using this option, you can float so you don't fall quite as fast and control your fall.

You get to maneuver this small ship in the see tunnel level. You must drive the ship from one dock to the next. It is a lot tougher than it may sound. If you run into too many walls, your ship will crack and eventually break open.

You must use superior whipping skills in order to get this column of spikes.

Take these lives out first because the bees that come out are nasty and can drain your life fast.

Here you must defeat the chicken-bird while falling. If you look in the corner, you'll see that Prof. Monkey Head is watching intently as you fall and fight.

Sometimes, you must use your whip for things other than killing and swinging.

Here you will have to battle this snail monster while bungee diving. The idea is to snap his bungee cord before he snags yours. Wear his cord down by pushing him into the wall. Be careful though, for the snail monster will be doing the same thing.

I really can't say that I mind having to rescue her! But there is one problem, I need your help. So please, pick up your controller and play this great game!

This rather attractive art is Princess

What's Her Name. She is the twin sister of Queen Plesting, Blasted, Feathered, Misformed, Skulptor-a-but. You must rescue her to save the day. Once you do, she'll be telling you her hero! Is that something to look forward to, or what?!

#### THE GOOD

This game has superb animation, sound, and is just overall fun to play.

#### THE BAD

The game is only half completed, the bad being I wasn't able to play more of the game.

#### THE UGLY

Watching poor Jim's head fry when his suit explodes.

### THE GOOD

The best-looking Genesis game yet and just about the most fun to play as well!

### THE BAD

Not a whole lot of icons to choose from here—you can pick up four, but that's about all you need.

### THE UGLY

The onslaught of games half as good as this. If they all looked like this, Nintendo'd be out of business!

## ICONS

There are only four power-ups in the game which are all listed below.

**Marbles** These are your principle weapons of choice.

**Rocket** This one really makes the level easier.

**Mouseketeer** This gives you an extra life to utilize.

**Star** This will give you one finger of life back.

**M**ickey Mania is an awesome game that spans 62 years in the life of Mickey Mouse, from Mickey's first incarnation, Steamboat Willie in 1928, to the Pauper of the 1990 short movie *The Prince and the Pauper*. The animation in this game is so incredible, it has to be seen to be believed! This beats out most Mode 7 games on the market. If you grew up with Mickey, you're in for a treat with this game!

## SAVE THE

## MICKEYS!!

## Steamboat Willie

Nov. 18, 1928

As you enter the year 1928, you find yourself on a dock of some kind. You pass by a ship about to set sail, and out of curiosity you peer in to see who the ship's captain is. You are startled to see an earlier incarnation of yourself! Steamboat Willie is spirited as well, and runs off. You have to go find him!

## Level 2-4 Map

# The Mad Doctor

1933

The stage takes place in the world of a mad doctor intent on giving you the closest hair-cut you've ever had. Pluto has been dograpped as well, and you have to rescue him. However, finding Pluto is not that easy. There are seven sub-levels you must go through before your final confrontation with the evil doctor himself.

# Moose Hunters

1937

It's time to do a little moose hunting. Based on the movie, you're in search of Moose Hunter Mickey. However, once you find him, you also happen to find an angry moose. This level really shows off the scaling capabilities of this game, especially as the moose is about to trample all over you. Be sure to watch Pluto for his reactions!

### THE GOOD

The flying perspective is just too cool. Next 3-D effect.

### THE BAD

Learning the field is very tough especially when there are too many anti-aircraft missiles.

### THE UGLY

Talk about some blood fest! Walk on a corpse and watch the blood flow.

## HAPPY LANDINGS

Throughout the battlefield you'll be able to land on certain spots where you can replenish your health and armaments.

Low on your rockets and bullets? Find this landing spot where you can replenish your weapons.

Fuel is very vital in your missions. Do not waste time wandering around wasting your fuel.

When you think you have suffered enough damage, you need to find the health icon.

Find these icons to get through the buildings.

## THE ASSAULT TEAM

This is where you'll get your hands dirty—in enemy buildings. Pick from three characters with different weapons ready for action. Don't let them die so easily. You only have them to do your dirty work.

# RED ZONE

## YOU HAVE 24 HOURS

## Dictator Declares Nuclear War

A mad dictator named Ivan Retowitz has announced war against the world. He has threatened nuclear destruction to any country trying to stop him. Many of Ivan's war machines have now been strategically placed on the battlefield. You, a well-known Apache ace, have been chosen to go deep within enemy territory to carry out a vital mission that will hopefully turn the tide

around. Your first mission involves activating a virus in the enemy's computers in order to hinder the enemy's communication and to slow down the enemy's activities. Later, you'll have to attack certain targets, leveling airports and bunkers, and finally taking out the nuclear missiles. The whole world is counting on you to get rid of the madness. Hurry, you only have 24 hours

## IN THE LINE OF FIRE

In this game you will face many war machines that will give you something to think about. Rely on your radar to pin point where they are located on the field.

This is your primary radar read-out. Use this information to find the safe routes that will lead you to the targets that are shown.

One way to stop them from detecting you is to wipe out their radar system.

## VIEWPOINT

The timeless Neo-Geo classic shooter that ruled the arcades (and some wealthy players' homes) is now taking home on your Genesis! American Sammy is re-developing the 16-Meg smash that, unfortunately, many people have never seen before. Color loss and background music aside, this game has a type of playing perspective that has not been seen since the days of Zaxxon. All the stages from the arcade are here as well as the all-around intensity that shoot-or-fans can relate to.

## THE GOOD

Players everywhere will get to play this now affordable classic.

## THE BAD

You're going to have to wait a little while longer because only a level or two was finished to date.

## THE UGLY

I'll never understand why our team only sends one fighter to battle an entire enemy armada.

## LEVEL 1

Concentrate your firepower on one of these rotating objects at a time.

These gears will change course right in front of you!

The pattern for this Boss is pretty simple to learn. Avoid its charge when its neck stretches out, its two main guns, and its spread shot.

## LEVEL 2

Watch out for fish ambushes waiting for you in the metallic river.

The action really gets intense during the second stage!

During this stage, you'll face a pair of turtles. They will circle around you and shoot at the same time. Other enemies will attack you as well, so be on your toes... or... thumb!

The central image features Taz, a cartoon character depicted as a tornado with a face, wearing a red bandana and a red and black striped shirt. He is shown in a dynamic, swirling pose against a large, red, fiery planet. Above him, the Earth is visible with a small satellite and two flags: one for Sega and another with the Sega logo and the text 'at 99 cents'. The background is a dark space with stars and a blue comet streak. The title 'TAZ-manic Panic!' is written in large, bold, white letters with a red outline. Below the title, the word 'TAZ' is written in a large, stylized, yellow and red font. Underneath 'TAZ', the subtitle 'IN ESCAPE FROM MARS' is written in a smaller, yellow font. Two game covers are prominently displayed: 'TAZ in ESCAPE FROM MARS' for the Sega Genesis and 'TAZ in ESCAPE FROM MARS' for the Game Gear. Below these are several smaller screenshots from the game, showing various levels and characters. The overall theme is action-packed and humorous, set in a sci-fi context.

# Some of the Beholder

**T**he game is a timeless classic on the PC and now it has been brought home to your Sega CD. Something evil is lurking in the sewers beneath the city of Waterdeep. The lords of Waterdeep have hired four hewlings to seek and destroy the dread looming over the city. Play as the four hewlings and take them through the sewers in order find out what is causing the problems. When you walk into the sewers, you turn around to see the ceiling collapse behind you, thus sealing the entrance. Now the only thing you can do is go through the sewer and hopefully find another way out.

Each level will have a ladder or stairs leading down to the next level. Some levels require passage through a portal, though.

This game has a map feature. Find the map on every level in order to find your way.

There are tons of monsters to fight in this game. The fighting is set up in a real-time situation. You can be attacked by an enemy as

you're walking through the maze. It doesn't switch to a light screen like other RPGs—you fight on your 3-D. Fighting is much

easier with a mouse. You will find lots of enemies everywhere and there are tons of different monsters to fight with. They get

progressively stronger and have more attacks the farther down in the dungeon you go.

Slash your weapon at the web to open it up. Beware! A spider is usually lurking behind. They are nasty, because if they bite you, poison will be injected into you.

# STAR CONTROL II

**T**ake heed all you sci-fi fans, Star Control II is here and there's never been anything quite like it! Combining the incredible fun of an RPG and the all-out action of a shooter, SCII is a blast from beginning to end.

Based on the wildly successful PC version, this one employs a full-motion, slick graphics rendered intro featuring

the ship in the game and the whole story of what happened.

Basically, your mission is to seek out the answer to removing the alien shield put around Earth by the Ur-Quan, an evil race that believes all inferior life forms should either be enslaved or join the ranks of the Ur-Quan forces.

This game is no walk in the park. Major exploration of hundreds of star systems must be searched for minerals and clues

leading to the Ur-Quan homeworld. Alien races that you stumble upon will often help out, but others aren't exactly friendly neighbors.

Loaded with actual voices, incredible music, and a story that will take weeks to solve adds up to one heck of a winner. This game is exactly what the 3DO needed and Crystal Dynamics came through in a big way. You don't want to miss the adventure of a lifetime.

## The Alien Races

Throughout the game, you will encounter many alien races, some friendly, some hostile. The races shown are just a small

portion of the total number you'll meet. Remember to speak nicely and watch out behind you at all times.

**Color Key**

- Can be Allied
- Neutral
- Hostile

Arlou	Druuge	Ilwath	Melnorme
The Arlou are eager to help out humans.	Race of traders; lives only for profit.	Can't be befriended. Hates humans!	Have useful info on biological life forms.
Mycon	Orz	Pkunk	Shofixti
Feel they must cleanse the universe.	The Orz race speak in confusing riddles.	Spiritual beliefs related to the Yehai.	Mean little rodents who love war!
Suren	Umguh	Utwig	Vux
Bekilled to humans in almost every way.	They're under control of the Ur-Quan.	They're intelligent forms of humans.	Feel humans are ugly and hate them.
Spathi	Supox	Yehai	Zeq-Fot-Pik
Cowardly but good allies.	A good source for getting information.	Has a queen who hates humans.	Three species living in harmony.

## Super Mele Combat

To break up the tension of the Normal Game, there's the Super Mele mode. Here, one or two players get to fly the ships that the alien races possess during the Normal Game. With 25 ships at your disposal, the mode can be played forever! As an added bonus, you get to utilize all the special attacks that each ship has.

At the Selection Screen, each team can choose a fleet of 12 ships for battle. There are two windows on the right side of the combat screen that show the status of your crew, which act as hit points, and a power meter which shows the battery charge of the ship. Simply fly around and try to blast each other while avoiding pesky planets and asteroids that get in your way.

At the Selection Screen, choose your fleet of 12 ships to engage in battle.

In the Combat Screen, you fly around and try to blast your enemy with heavy weaponry.

# Normal Game

The Normal Game is the RPG section where you must try to free the Earth from its slave shield put there by the Ur-Quan forces. Piloting a Precursor starship, you must seek out allies who wish to aid you on your quest. Of course, there are other races completely faithful to the Ur-Quan and will resist you. You'll explore hundreds of star systems in search of minerals, life forms, and information needed to defeat the Ur-Quan hierarchy.

## At the Starbase

At the Starbase, you can unload minerals in exchange for credits to outfit your starship with stronger weaponry.

## On the Surface

The surface is where you'll mine for minerals to log back to the Starbase. When you enter a star system, you can scan the planet and get information such as seismic activity and scan for mineral, energy, or biological life. You can then land on the surface and mine up the riches.

## Encountering Races

It is inevitable that you meet alien life forms in space. Each race has a unique story and can either be allied with you or try to blow you out of the stars, depending on how you talk to them. Some races, like the Melnconne, are very helpful at giving information in exchange for alien life forms you pick up from the surface. So a good negotiator and you might just succeed.

Every time you encounter a race, you take part in a series of question and answers. Say the wrong words and you could be eating space dust.

## Solve Mysteries

There are many little twists and turns in the plot to keep you involved through your entire trek. Mysteries such as the Rainbow Worlds, the Spithi slave shielding, and the totemic Deyarrl race are just a small part of what you'll come up against.

## Hyperspace

Using Hyperspace is the only way to get around the galaxy. Use the StarMap to locate a star system you wish to explore. Out in Hyperspace, you will run into the many life forms and often battles ensue when you enter unknown territory. Travelling in Hyperspace uses a lot of fuel.

Use the Star Map to locate new alien worlds and travel among the stars at high speeds.

In Hyperspace, the skies are a bright orange. They are green in Quasiaspace.

### THE GOOD

What isn't? The plot is fantastic, the music is awesome, and the game is simply too much fun!

### THE BAD

Um ... okay, the voices of some of the aliens are a little difficult to understand.

### THE UGLY

The entire Pkunk race looks like distant relatives of Teoacan Sars. How about some Froot Loops?

## OOHHH! IT'S SO SCARY!

## HOW TO FIGHT

To survive the game, you must know how to fight. Hold down the A button and press in any direction on the control pad. Press Down or Up for kicks. Press Right for a right cross and Left for an uppercut.

Find a key to open certain chests around the house.

Read a letter to find out more about what's ahead.

Push this chest over a trap, don't avoid the monster.

Watch out! Don't get cornered by an attacking monster.

If you die, the monster will drag your body to the dungeon.

## THE GOOD

## THE UGLY

The game is a great horror story. Some players may even get a few chills running up their spine.

The owner of this mysterious building, Jeremy Hartwood, died a few days ago. The police report concluded that he had taken his own life. Decreto is now empty. Rumors abound of a curse or of an evil power dwelling within its walls. For some days now a cloud of doubt has hung over your mind: What are those lights inside the house at nightfall? What could account for the eerie noises? Why did Jeremy commit suicide? And what compels you toward the house? What is Decreto's secret?

**F**rom the box office comes the most explosive video game to appear for the 3DO! Demolition Man gives you the chance to play as Detective John Spartan. As the most dangerous cop in the late 20th century, you must track down the most notorious criminal of all.

Repel down an abandoned building and take on Simon Phoenix's men. Then make your way through all the doors and corridors on your way toward the evil villain himself!

Demolition Man comes complete with footage taken directly from the movie, plus some really cool computer-rendered images not in the film!

## THE GOOD

This game is loaded with awesome graphics as well as some original computer-rendered images.

## THE BAD

Controlling the targeting sight is kind of difficult. It might have been better with a mouse.

## THE UGLY

I think the game could have been better without the close-ups of Wesley Snipes' ugly mug.

Enemies will sometimes throw hand grenades at you. Shoot them as soon as you can.

These guys will do whatever it takes to kill you. You'll be attacked from every direction, so watch out and nail anything that moves.

Be careful when you first land on top of the building. There are gangs of Phoenix's men hiding out behind crates and doors.

There are times when enemies will sneak up real close on you. Blow their big fat heads away!

## BATTLE IT OUT WITH SIMON PHOENIX

# DIMO'S QUEST

## THE GOOD

This has got to be one of the most addictive puzzle games I've ever played! Excellent game!

## THE BAD

The game seems to be suited more toward the younger age. Older players may not enjoy it.

## THE UGLY

The game tells a tad short on manners. After you finish a level Dimo lets loose with a disgusting belch!

**D**imo's Quest is a new puzzle game coming your way for the CD-I! At first glance, the game seems to be directed more at the younger age group. That doesn't mean the puzzles you're going to encounter are a piece of cake though! Jan Dimo on his quest to grab as many pieces of candy as possible throughout each level of mayhem and madness! Each level has a goal you must reach before you can progress through the game. In order to reach the exit, you

must figure out the many ruses and puzzles within each level. The game has excellent graphics, vibrant colors, plus the music and sound effects are done to perfection on the CD-I! Dimo's Quest is very addictive to play. At the same time, it teaches the little ones many different skills, such as identifying numbers and colors, reading, and most of all, major motor skills! Remember, just because it's educational, doesn't mean it can't be fun!

## PUZZLE PIECES!

Candy and sweets aren't the only things you'll be searching for in Dimo's Quest. Here's a sneak peek at some of the cool items. Check it out!

-   Before finishing each level, collect all the sweets.
-   There seem to be more doors than keys, so grab all you can.
-   To crash through a weak wall, try to break it with a stone.
-   The orange arrows control the vacuum cleaner. Suck 'em up!
-   When walking on the tracks, be careful of the wires!

The only way to get across the water is with a life preserver.

The fire extinguisher allows you to safely cross the lava pits.

These blocks get weaker every time you walk on them!

The locks can only be opened with the same color keys.

These blocks are always safe to walk on.

The bullets can be deadly, but they only shoot in one direction.

Watch your step when you reach one of these traps!

To get across the electric railway, hop on the rails.

The ice can be slippery unless you have the right boots.

If you walk over these, you will be transported to a new area.

There are many switches that do many different things.

These solid blocks can never be destroyed by anything!

Be careful! These arrows will take you for a ride!

The explosives are very small but dangerous!

Check out the awesome map of Level Eight, sugar freaks! Begin this level in the middle of a whole bunch of candy and chocolate! Grab all of the sweets, but be very careful! There are explosives placed throughout the sugar field! When you make it over to the right, you need to avoid yourself from the bullets by pushing one of the boulders in front of it. Go all the way to the upper right, and grab the ice boots, so you can flip the two switches above the top of the ice. Cruise all the way over to the left side and hold on to your shorts when you ride the arrow! Now you're at the exit. The only problem is: can you figure out how to get to it?

The very popular TV game show Jeopardy! will soon be making its way over to the CD-I. First of all, whether you're a fan of the TV show or not, Jeopardy! is so much fun, you'll forget how educational the game can actually be. The game itself was done very well. Instead of wasting the CD-I's capabilities on a bunch of fancy screen shots of glitzy graphics, the emphasis was placed on using the memory for tons of different categories which means the game has excellent replay value. With the ability to have four people playing at once, Jeopardy! has my vote for being the best family game out yet for the CD-I.

### THE GOOD

Most games with this type of theme are more work than they are fun due to all the typing. Not this time!

### THE BAD

You should be able to see a little more of Alex, and maybe some commercials in-between rounds.

### THE ONLY

The ugliest thing about Jeopardy! is the control. The cursor seems to drag a lot when playing.

Choose whichever category you're most familiar with, and receive money for each correct answer.

You can place a wager on the Daily Double question, considering you have the money to back it up.

## PLAYER SELECTION

At the Player Selection Screen, you can choose between one to four players.

When picking names, you can choose team names and even nicknames!

Alex will refer to you by your name throughout the game. Cool!

## CATEGORIES

Because of the huge amount of memory that the CD-I can handle, Jeopardy! is loaded with different categories to choose from!

When you reach the header categories, some of the questions can be near impossible to answer!

This game can be enjoyed by the whole family, and all of the questions are current and up-to-date.

If you make it past rounds one and two, you will be able to enter the Final Jeopardy round. Good luck!

Instead of typing in the whole word, you can scan from a list of possibilities when you get the first couple of letters in.

**BEAVIS AND BUTT-HEAD**

**B**eavis and Butt-head are finally free in their own game for the Game Gear! This game is a side-scrolling action game where you control the rude pair through some crazy adventures. You have to jump over fire hydrants and other obstacles while you search cash machines and phones for money.

The money will be used like in the game to buy food to keep them alive. But don't eat too much or you'll end up on the toilet! The game features some really cool effects like voices that are directly from the game. If you are a fan of the terrible twosome, then you will get a real kick out of this one!

**Level 1**

Jump over the obstacle to reach the ice cream on the other side.

Here you can get hit twice so your timing has to be perfect.

Whoa! What's this guy's problem? Run past him quickly to get by.

**Be careful!**

Don't eat too much food or you will end up in the bathroom and lose power.

**Level 2**

Now you are at the school and you have guys in the lockers.

Beware of the bully. He'll try to keep you from your goal.

Pick up the money so you can buy food for health.

Push up at the food counter and they will give you health.

**Level 3**

Even at the hospital there are exploding time bombs.

It's hard to stop and buy food when there are carts everywhere.

**THE GOOD**

The sounds in this game are really good and the voices are very cool!

**THE BAD**

Sometimes there are so many enemies that you have to take multiple hits.

**THE UGLY**

The dude standing in the middle of the street, wearing leather, attacking you with a whip!

This is a hard part to get past because this takes so much power off.

**S**trap yourself into the cockpit of America's hottest jet fighter, the F-15 Strike Eagle. Fly hundreds of different missions, each with primary and secondary targets, through six game worlds. A streamlined weapons console targets enemy planes so you can concentrate on flying and fighting. Enemy pilots and missile crews act and react intelligently. Pilot your F-15 on dangerous missions in the Persian Gulf. Locate and destroy chemical warfare plants, blast entrenched positions, and lead an all-out assault against the enemy's capital city.

### THE GOOD

There are plenty of cool missions you can undertake and the digitized voices are pretty good, too!

### THE BAD

The graphics are bland and the lack of detail makes it hard to tell if an object is an enemy.

### THE UGLY

Although the voices are done very well, I can't really say the same thing about the sound effects.

## OPTIONS

At the beginning, choose a new game or play a saved one.

Choose the difficulty setting and set the music options.

## MISSIONS

Select from among a huge assortment of missions.

After choosing the mission, you'll be briefed on what's ahead.

Your targeting system will lock onto an enemy, increasing your chances to hit him.

Other missions involve other weather conditions. Here is a foggy fly over.

Use your missiles on locked targets. They're great for large targets.

# It's time you finally did something about those monsters under your bed.

3DO

You're not a helpless kid anymore. You've grown up and you've got *Slayer*, the first **Advanced Dungeons & Dragons**® game on 3DO.

Now you're an AD&D® game hero armed with weapons and magic, exploring dungeons filled with the deadly monsters of your nightmares.

Hack and slash away at these vile creatures, avoid treacherous traps and solve mind-bending puzzles.

The randomized dungeon generator can create over 4 billion different dungeons.

Which means a new monster hunt every time you play!

Because it's designed for play on 3DO, *Slayer* gives you the most awesome graphics and animation you've ever seen. Plus a first-person perspective that lets you look up, down and all around.

It's virtually real!

*Slayer*. It's time you made those monsters look under *their* beds!

## The Wristwatch Meets Telecommunications

**S**tep aside, Dick Tracy! Your days of wristwatch communicator exclusivity are numbered.

Unveiled for the first time at the Summer CES, the Telewatch from MicroTalk Technologies is a wrist-worn cordless telephone and wristwatch all in one.

features often not found on even full-sized cordless phones, including alphanumeric memory speed dial, a "hold" function, a scramble circuit for excellent electronic privacy, and an Intercom feature that allows you to communicate directly with other Telewatch users.

Like a cordless phone, the Telewatch range is limited. It is intended only for home or office use. However, MicroTalk Technologies is presently working on a cellular version that would

virtually free up the user to phone from almost any location.

With the days of the Dick Tracy wristwatch communicator already upon us, can the Maxwell Smart ShoePhone be far behind?

Harnessing the very latest in advanced miniaturization technologies, the Telewatch measures a mere 2.2 x 1.6 inches, and only slightly more than 1/4 inch in depth.

But in spite of its size, the Telewatch includes several

## New Phonecard Makes Cents

**S**ay goodbye to those days of pumping quarters into payphones;

TLC's PhoneCash is the calling card anyone can get.

PhoneCash is an innovative, new calling card service. The card works like any other calling card—callers dial an 800 number and a PIN—but with one slight difference; the PhoneCash card is already pre-paid.

That's right. Buyers can purchase PhoneCash for \$8, \$10, or \$25 at

convenience stores and other retail outlets. As the card is used, a computer voice will tell the user how much time remains on that

particular card. When that card is spent, callers simply need to purchase another.

The beauty of the PhoneCash card is not only does it eliminate the need for quarters at a payphone, but it can eliminate that nasty end-of-the-month phone bill, because it allows you to better budget your phone time.

new interactive Batter Up. Batter Up is the first-ever interactive video baseball bat. Compatible with both the Sega Genesis and the Super NES, Batter Up works with all baseball games designed for either system. From Nintendo's Ken Griffey, Jr. Presents to Sega's World Series, get ready to step up to the plate and swing for the stands.

Made by the makers of last year's TeeV Golf, Batter Up is a foam-covered plastic bat that actually lets you swing at the video pitch. Timing is the key as your cut must turn the plate at the moment the pitch crosses it. All offensive moves are controlled with the bat.

Better Up is available in both standard and wireless versions. The

## Rare Football Card Discovered

This football card is considered by experts to be the last one of its kind still in existence. In a series of bizarre sightings during the 1970s, office stores and natural dealers destroyed what was thought to be all of the United States series. Produced by the now-defunct Swill Cards, the card highlights the illustrious career of gridiron legend and head coach, Frank "The General" Earl. Today's only New York collector has the actual work of the card in his possession in the neighborhood of \$25,000.

### 1953 Pittsburgh Bulldog

by [unreadable]

The first year ever produced by Swill Cards during the period of the 1950s was the 1953 Pittsburgh Bulldog. One of the great failures of the company was the "General" Frank Earl series. The Pittsburgh team was well known for its gridiron hero, Frank Earl, who was a two-time All-Pro player and a member of the Pro Football Hall of Fame.

At the peak of its playing days, the Pittsburgh team had to get only the opponents beaten by the Pittsburgh team. The year found in possession of the Pittsburgh team.

# The Next Generation: The Adventure Lives On...

## Spectrum-Holobyte to Release New Title for the PC CD-ROM

**H**es the cancellation of *The Next Generation* left you catatonic? Do you find yourself watching the re-runs and salivating for more? Does your overzealous anticipation for the *Star Trek Generations* movie throw you to a sweet-dreaming frenzy?

Well Trekkers, if you answered yes to any one of these three questions, then take heart. Help is close at hand with *Star Trek: The Next Generation A Final Unity*, a brand new CD-ROM adventure for the PC.

The game is true to the look and the feel of the show. With all eight of the show's principal actors leading their actual voices to the CD-ROM, "A Final Unity" delivers to game players the personal experience of a genuine *Star Trek* voyage.

The story is epic in the grand tradition of graphic adventures, incorporating elements of a sophisticated space-flight simulation.

Players embark on various missions in the name of the Federation and find themselves trapped in the middle of an unfolding mystery with the *Enterprise* crew.

Within this intergalactic adventure, players must maneuver the *Enterprise* within a 3-D tactical space, beam down Away Teams to investigate alien planets, explore the many hundreds of stars that lie within known space, and employ the vast resources of the U.S.S. *Enterprise* to meet the challenges that lie ahead.

With even of the main characters to choose from, players must decide which crew member is best suited to tackle each and every

given situation.

A *Final Unity* is the latest title from Spectrum-Holobyte, the folks who earlier beamed home *Star Trek: The Next Generation Futures Past* for the Super NES.

In addition, Spectrum-Holobyte has recently inked a deal with Paramount Pictures, allowing them the rights to develop new games based on the highly anticipated *Star Trek Generations* movie due out in November.

In the meantime, *Star Trek* enthusiasts will want to whet their appetite for adventure by checking out *A Final Unity* for the PC CD-ROM. Available in October, look for it to move at Warp Factor 8 off the shelves of your local game dealer.

# From Coast to Coast SuperTour '94 Delivers

**B**uilding on the unprecedented success of SuperTour '93, this year's EGM/NEBO

SuperTour looks to be an even greater success.

With over 20 stops nationwide, SuperTour '94 will hit major malls and comic book conventions in almost every major metropolitan area, giving kids everywhere a taste of the action.

Comic fans love the SuperTour for the chance to meet some of the hottest artists working on their favorite comic books. Image Comics, as the sole comics sponsor of SuperTour '94, has brought onboard a slew of fantastic artists and characters to make guest appearances at each and every stop.

Video gamers love the SuperTour for the opportunity to try out some of the coolest new games and systems before anyone

else does.

The second annual SuperTour features some of the best new video games like Charles Barkley Shut Up and Jam!, Claymates, Mega Turrican, and John Madden Football.

Gamers can check out first-hand new systems like the Atari Jaguar and the Panasonic REAL 3DO, as well as exciting new products like the ASCII Super Controllers and the Interactor virtual reality vest from Auna Systems.

On top of all that, SuperTour '94 offers plenty of excitement in the way of contests, competitions, and giveaways with great prizes like an Atari Jaguar and a Talex from the Crypt pinball machine from Data East. Everyone walks away from the SuperTour a winner.

SuperTour '94 grinds to a close very soon with a final stop September 9-11 at the Southcenter Mall in Seattle, WA. But don't worry too much if you missed the bus this year; SuperTour '95 is right around the corner.

# PLAY AS AKUMA!

YES! It's true!  
You CAN play as the most  
fearsome boss character  
ever created! Follow the  
instructions to the right, and be  
ready to amaze your friends at  
the arcade!

Don't get too confident,  
though, because

Akuma's power is  
toned down to make matches  
fair. For example,

Akuma can only  
throw one Air Fireball  
instead of two, and all damage  
takes are weak. Two play-  
ers can pick Akuma, using this  
trick as well! Look for the new,  
special Akuma ending, too!

This Super Trick comes  
directly from Steve  
Warwick, of Los  
Angeles, CA. Many  
thanks, Steve!

## INSTRUCTIONS

The first step to Akuma's trick  
starts with a machine set on  
Free Speed Select. You must  
select Speed 3 with the Flare  
button when your character's  
cursor is on Ryu (player one or  
two). Once you press Flare to  
select the speed, pause two  
seconds on Ryu. Move directly  
to T Hawk and pause two seconds.  
Move to Guile and  
pause two seconds. Move to  
Cammy by passing through  
Dhalsim. Pause for two seconds  
again. Move directly to  
Ken then up to Ryu, where  
you pause for two seconds  
one last time. Then press all  
three punch buttons and your  
Start button (1P for player one,  
2P for player two) at the same  
time. Akuma will replace Ryu  
as your character selection!

## 3DO UPGRADED TO 64-BIT IN 1995!

EGM has learned from its sources that 3DO will be upgrading its current REAL system to 64-Bits in late 1995.

This upgrade will make the 3DO a full-blown 64-Bit machine. Not only will it have specifications vastly superior to those of the current 32-Bit system, but it will also be significantly better than those of the highly touted Sony PlayStation!

More specifically, besides going from 32-Bits to 64-Bits of power, the clock speed will be bumped up to the pentium range—68 MHz. In addition, the systems bus bandwidth will be an unbelievable 400 Mb per second wide. This, it should be known, is three times greater than the current spec being talked about for Sony's PlayStation. Another bonus will be the fact that the current add-on MPEG-1 cart may be built in. When the MPEG-2 standard is finally agreed on, the new system will be ready for it via another optional plug-in cart. One of the big specs, being talked about by Sony and Sega (Saturn), is the number of texture-mapped polygons that can be rendered per second. The new 64-Bit 3DO will be able to approach and hit the magical 250,000 number. Ancillary specs include 100,000,000 pixels per second, 150,000 triangles per second, and texture mapping done in hardware rather than software. All system specs are preliminary at best and none have been confirmed by 3DO.

Owners of current 3DO's, or those players who plan to buy the present machine, will not have to worry about any type of hardware incompatibility as everything discussed here will be built into an upgrade cartridge that will plug

into the side of the current machine! This cart, sources indicate, could be as inexpensive as \$100, but analysts point out that it could go as high as \$250.

While some sources indicate that 3DO will be bringing out a whole new machine, people inside 3DO are indicating that this upgrade will only be done via the add on cartridge.

When we contacted the 3DO company for comment, Bob Faber, for the record, could only state that they could neither confirm nor deny any of the above information. Other officials at 3DO stated that a formal announcement regarding any possible upgrade will be made within the next two months.

These officials almost acknowledged the plug-in module upgrade concept when they told us: "When we think about ways of upgrading capabilities in the system, we think about things in

the fashion of a digital video module. And when you get it [the expansion module] this allows you to use software that allows you to use that capability. You know, so that it becomes just another feature of the system. It is almost the same as adding a memory card, some of the software can take advantage of it and when you buy the card you can use that feature."

For the record Bob Faber did say "If you're a gamer and you really care about the very best gaming experience then 3DO today is a very safe purchase for you. We know that 3DO is the best system today and the 3DO system that you buy today will continue to be the best one tomorrow."

He went on further to say: "It is a fair speculation that 3DO is always looking at new technologies and we intend to respond appropriately whenever our competition decides they are going to catch up to where we are today."

Some pretty heavy words here. Of course we all will have to wait a couple of months to really see what 3DO is planning for 1995, but for now the main point that 3DO is trying to make is that, no matter what happens in the future, they never will make their older game system obsolete. More next month!

# NEVER LOAN OUT YOUR STICK.

Hey, Billy, since you're gonna be away, can I borrow your Fighter Stick for a few days? I promise—I'll take real good care of it. ... That's how it starts. Then

days turn into weeks, and the next thing you know, you and your former best friend are duking it out on the People's Court. One look at the Fighter Stick, and you'll know why. There's enough power here to change a person, to make 'em

untrustworthy, even. There's Turbo-Fire and Auto-Turbo, with up to 36 shots per second. And super-slowmo lets you digest those really tough moves.

So, quit wasting with those boring, wimpy control pads — reach for the Fighter Stick SM for the Super NES or the Fighter Stick SGE for Sega-Genesis and Sega-CD.
